Merchant Marine and Fisheries, 1964 **Imagining Atlantis** Richard Ellis, 2012-01-11 Ever since Plato created the legend of the lost island of Atlantis it has maintained a uniquely strong grip on the human imagination For two and a half millennia the story of the city and its catastrophic downfall has inspired people from Francis Bacon to Jules Verne to Jacques Cousteau to speculate on the island s origins nature and location and sometimes even to search for its physical remains It has endured as a part of the mythology of many different cultures yet there is no indisputable evidence let alone proof that Atlantis ever existed What then accounts for its seemingly inexhaustible appeal Richard Ellis plunges into this rich topic investigating the roots of the legend and following its various manifestations into the present He begins with the story s origins Did it arise from a common prehistorical myth Was it a historical remnant of a lost city of pre Columbians or ancient Egyptians Was Atlantis an extraterrestrial colony Ellis sifts through the scientific evidence marshaled to prove these theories and describes the mystical and spiritual significance that has accrued to them over the centuries He goes on to explore the possibility that the fable of Atlantis was inspired by a conflation of the high culture of Minoan Crete with the destruction wrought on the Aegean world by the cataclysmic eruption around 1500 b c of the volcanic island of Thera or Santorini A fascinating historical and archaeological detective story *Imagining Atlantis* is a valuable addition to the literature on this essential aspect of our mythohistory *Oceanography, 1960-1970* National Research Council (U.S.).  January June      A Review of 'Oceanography 1960-1970' and Comments on the Interagency Committee on Oceanography  
 Fiscal Year 1962 Program National Research Council (U.S.). Committee on Oceanography, 1961 Excerpt from A Review of  
 Oceanography 1960 to 1970 And Comments on the Interagency Committee on Oceanography Fiscal Year 1962 Program We  
 agree with and reemphasize the statement in the ico Report that the education of young scientists is the most important part  
 of our long range national program The situation is improving Oceanography departments in universities report a distinct  
 increase in student interest in the last two years amounting in some cases to a flood of applicants This is almost certainly due  
 to the increased public interest in oceanography and to better financial support for the field It has been possible to increase  
 the enrollment of well qualified candidates some 50 100% in those institutions having the necessary space and funds Other  
 institutions have been unable to increase their graduate student bodies in spite of increases in the number of applicants  
 because of lack of space or funds for support Those institutions which have increased their student bodies can go no further  
 because of lack of space There has been a tendency in the last two years to liberalize policies for granting federal aid to  
 oceanographic education Some agencies now make grants providing direct support for thesis research To a limited degree  
 training grants have been made available through the National Science Foundation and the Department of Health, Education  
 and Welfare The Office of Naval Research contract research program continues to provide a most valuable source of support  
 for graduate research assistantships By general support of basic research institutions our has developed a stable and  
 beneficial atmosphere for long range research programs in which graduate students can be supported Ford Foundation  
 fellowships totalling about one million dollars also have become available to some oceanographic institutions About the
