Battles of the Dark Ages Peter Marren, 2006-09-18 A look at what world history might have been like if not for the fall of the Western Roman Empire This is a fascinating exploration of how the history of Europe and indeed the world might have been different if the Western Roman Empire had survived the crises that pulled it apart in the fourth and fifth centuries The author starts by showing how that survival and recovery might plausibly have happened if several relatively minor things had been different He then moves on to discuss a series of scenarios which might have altered the course of subsequent history dramatically Would the survival of a strong Western Empire have assisted the Eastern Byzantine Empire in halting the expansion of Islam in the Middle East and North Africa How would the Western Roman Empire have handled the Viking threat Could they even have exploited the Viking discovery of America and established successful colonies there While necessarily speculative all the scenarios are discussed within the framework of a deep understanding of the major driving forces tensions and trends that shaped European history and help to shed light upon them In so doing they help us understand why things panned out as they did as well as what might have been

King Arthur's Country

Stuart Laycock, Christopher Gidlow, 2024-12-30 England today is a rich complex mix of identities cultures and heritages However in the decades after Roman Britain collapsed in the fifth century the cultures of the Angles and of the Saxons with significant degrees of homogeneity spread rapidly westwards across much of eastern southern and central England Then it stopped Or was stopped For the area then still beyond Anglo Saxon reach is characterized by a network of military and economic links across the island Perhaps significantly this includes parts of Britain traditionally associated with King Arthur Later the multi ethnic and multi cultural kingdom of Mercia in alliance with British kingdoms in Wales spread from the Midlands across England under the mysterious King Penda dominating the earlier Anglo Saxon kingdoms with its wealth and military power The region that gave birth to Mercia is also a region that was a most likely base for the elusive figure of King Arthur The authors use historical and archaeological evidence much of it new to explore the link between Arthur s kingdom and the rise of Penda s Mercia They seek to locate lost Arthurian battlefields and understand what happened there with exciting new results This is the story of one region two kings and two centuries that changed England forever **War and Society in Medieval Wales 633-1283** Sean Davies, 2014-11-15 The story of Wales from the end of the Roman period to the conquest by Edward I in 1283 is unknown to most but recent historiography has opened up the source material and allowed for a modern critical reappraisal The development of the country is traced within the context of the rest of post Roman western Europe in a study that is a valuable resource for anyone with an interest in military history and the history of Wales in relation to its neighbours in Britain and on the continent *Post-Roman Kingdoms* Raffaele D'Amato, 2023-01-19 Meticulously researched this book examines the evidence for the post Roman military forces of France and Britain during the Dark Ages reconstructing their way of life and the battles they fought in compelling detail The collapse of the former Western Roman Empire during the so called Dark Ages c AD 410 was gradual and piecemeal Out of this vacuum arose regional tribes and leaders determined to take back kingdoms that were theirs and oust any Roman presence for good However the Roman guard was tenacious and survived in small pockets that emerged in both Gaul and Britain These areas of Romano Celtic resistance held out against the Saxons until at least the mid 6th century in Britain and against the Visigoths and the Merovingian Franks until the late 8th century in France Drawing on archaeological finds contemporary sculpture and manuscript illuminations Dr Raffaele D Amato presents contemporary evidence for 5th to 9th century Gallic and British Dark Age armies and reconstructs their way of life and the battles they fought The text accompanied by photographs and colour illustrations paints an intricate picture of how these disparate groups of Roman soldiers survived and adapted on the fringes of the Roman Empire Anglo-Saxon Kings and Warlords AD 400-1070 Raffaele D'Amato, Stephen Pollington, 2023-10-26 Richly illustrated this title describes Anglo Saxon monarchs warlords and their warriors and households in Anglo Saxon Britain from the first post Roman mercenaries to the Norman Conquest In a country fragmented by Roman withdrawal during the 5th century AD the employment of Germanic mercenaries by local rulers in Anglo Saxon Britain was commonplace

These mercenaries became settlers forcing Romano British communities into Wales and the West Country Against a background of spreading Christianity the struggles of rival British and Anglo Saxon kingdoms were exploited by the Vikings but eventually contained by the Anglo Saxon king Alfred of Wessex His descendants unified the country during the 10th century however subsequent weak rule saw its 25 year incorporation into a Danish empire before it finally fell to the Norman invasion of 1066 Scholars of the early Church have long known that the term Dark Ages for the 5th to 11th centuries in Britain refers only to a lack of written sources and gives a false impression of material culture The Anglo Saxon warrior elite were equipped with magnificent armour influenced by the cultures of the late Romans the Scandinavian Vendel people the Frankish Merovingians Carolingians and Ottonians and also the Vikings In this volume co authors Raffaele D Amato and Stephen Pollington access their extended knowledge to paint a vivid picture of the kings and warlords of the time with the aid of colour illustrations rare photos and the latest archaeological research

Image and Ornament in the Early Medieval West Matthias Friedrich,2023-03-16 Scholarship often treats the post Roman art produced in central and north western Europe as representative of the pagan identities of the new Germanic rulers of the early medieval world In this book Matthias Friedrich offers a critical reevaluation of the ethnic and religious categories of art that still inform our understanding of early medieval art and archaeology He scrutinises early medieval visual culture by combining archaeological approaches with art historical methods based on contemporary theory Friedrich examines the transformation of Roman imperial images together with the contemporary highly ornamented material culture that is epitomized by animal art Through a rigorous analysis of a range of objects he demonstrates how these pathways produced an aesthetic that promoted variety varietas a cross cultural concept that bridged the various ethnic and religious identities of post Roman Europe and the Mediterranean worlds

The English Aristocracy at War David Simpkin, 2008 In 1277 the recently crowned king of England, Edward I, invaded Wales. His army, large for the time, was none the less modest by his later standards. Most of his countrymen had not been on active service outside the realm for twenty years and more, if at all, yet over the course of the following four decades up to the battle of Bannockburn in 1314 they would be called upon to fight in four different theatres of war in Wales, Gascony, Flanders, and Scotland. Although the identities of many of the men who fought in these wars, particularly those of the thousands of peasant foot soldiers, will never be known, the names of a large proportion of the men at arms can be located in the records of central government. This book utilises these sources, payrolls, horse inventories, wardrobe books, and others to examine the military careers and activities of these men at arms, focussing on five main themes: mobilisation, military command, service patterns among the gentry, retinues, and their composition, and feudal service.

The Medieval Warrior Aristocracy Andrew Cowell, 2007 A major reconsideration of the relationship between warrior aristocrats, epics, and heroes in medieval culture. The process of identity formation during the central Middle Ages, 10th-12th centuries, among the warrior aristocracy was fundamentally centered on the paired practices of gift-giving and violent taking, inextricably linked elements of the same basic symbolic economy. These performative practices cannot be understood without reference to a concept of the sacred which anchored and governed the performances, providing the goal and rationale of social and military action. After focussing on anthropological theory, social history, and chronicles, the author turns to the literary persona of the hero as seen in the epic. He argues that the hero was specifically a narrative touchstone.

used for reflection on the nature and limits of aggressive identity formation among the medieval warrior elite the hero can be seen from a theoretical perspective as a supplement to his own society who both perfectly incarnated its values but also in attaining full integrity short circuited the very mechanisms of identity formation and reciprocity which undergirded the society The book shows that the relationship between warriors heroes and their opponents especially Saracens must be understood as a complex tri partite structure not a simple binary opposition in which the identity of each constituent depends on the other two ANDREW COWELL is Associate Professor of the Department of French and Italian and the Department of Linguistics at the University of Colorado Warfare and Society in the Barbarian West 450-900 Guy Halsall, 2008-01-28 Warfare was an integral part of early medieval life This book looks at warfare in a rounded context in the British Isles and Western Europe between the end of the Roman Empire and the break up of the Carolingian Empire **Medieval Warfare** Maurice Hugh Keen, 2001
