1963 1983 *Inventing Los Alamos* Jon Hunner,2014-08-04 A social history of New Mexico s Atomic City Los Alamos New Mexico birthplace of the Atomic Age is the community that revolutionized modern weaponry and science An instant city created in 1943 Los Alamos quickly grew to accommodate six thousand people scientists and experts who came to work in the top secret laboratories others drawn by jobs in support industries and the families How these people as a community faced both the fevered rush to create an atomic bomb and the intensity of the subsequent cold war era is the focus of Jon Hunner s fascinating narrative history Much has been written about scientific developments at Los Alamos but until this book little has been said about the community that fostered them Using government records and the personal accounts of early residents Inventing Los Alamos traces the evolution of the town during its first fifteen years as home to a national laboratory and documents the town s creation the lives of the families who lived there and the impact of this small community on the

Although the World War II efforts to develop nuclear weapons have inspired a very large literature it struck us as noteworthy that virtually nothing existed in the form of firsthand accounts Now It Can Be Told by General Leslie Groves the Manhattan Project s military commander is probably the most prominent exception but the scientists themselves seem to have shown little interest in publishing their reminiscences Believing that it would be not only worthwhile for posterity but extremely interesting for the present generation to hear about the aspirations fears and activities of those who participated in this watershed of science and government collaboration we arranged the public lecture series represented by this book We chose to focus upon Los Alamos since the project s efforts culminated there The isolated laboratory in New Mexico was created to design and construct the first atomic bombs More scientific brainpower was accumulated there than at any time since Isaac Newton dined alone and the interactions with this community are of sociological interest as the results of their work are of political import *Los Alamos* Los Alamos Scientific Laboratory,Los Alamos Scientific Laboratory Public Relations Staff,1992
