 Schlünder,Rolando M. Carrasco,2022-08-01 This volume proposes new ways of understanding the historical semantics of the
 relationship between humans and nature in South America in the eighteenth and early nineteenth centuries The authors in
 this volume use the notion of asymmetry to discuss the representations of and forms of knowledge about nature circulating in
 and about colonial and postcolonial South America They argue that the production of knowledge about the American natural
 space widened the power gap between the Europeans colonizers and the local population This gap therefore rests on what
 we call asymmetric ecologies Eurocentric epistemic orders excluded forms of indigenous mestizo and Creole knowledge
 about nature By looking at literary as well as non literary sources such as natural histories travel narratives encyclopaedias
 or medical writing the essays in this volume trace the origins of new theoretical paradigms ecocriticism biopolitics transarea
 studies etc and examine the regional cultural identity and epistemic conflicts that undercut the Eurocentric narrative of
 enlightened modernity Host Bibliographic Record for Boundwith Item Barcode 30112054272791 and Others ,2013
