Three quarters of a century later bestselling author Doug Preston joined a team of scientists on a groundbreaking new quest. In 2012 he climbed aboard a rickety single engine plane carrying the machine that would change everything: lidar, a highly advanced classified technology that could map the terrain under the densest rainforest canopy. In an unexplored valley ringed by steep mountains that flight revealed the unmistakable image of a sprawling metropolis, tantalizing evidence of not just an undiscovered city but an enigmatic lost civilization. Venturing into this raw, treacherous but breathtakingly beautiful wilderness to confirm the discovery, Preston and the team battled torrential rains, quickmud, disease, carrying insects, jaguars, and deadly snakes. But it wasn't until they returned that tragedy struck. Preston and others found they had contracted in the ruins a horrifying, sometimes lethal and incurable disease.
