

Grandfather

*From the very first moment you smiled upon me,
You gave all that you had...unconditionally.
You taught me of kindness, and patience and love,
And we formed a closeness God blessed from above.*

*Then the seasons passed quickly, and as I grew,
Each year just increased my devotion to you.
And I learned among other things, from your caress,
That the world is much sweeter with tenderness.*

*That every young heart should have someone like you,
Who helps them believe dreams can really come true.
Someone who always remains by their side,
Whose faith in them fosters a strong sense of pride.*

*One sweet, special someone, "Grandfather" by name,
Whose love helps ignite a perpetual flame,
That adds warmth and beauty in so many ways,
A light that will guide me through all of my days.*

Storytelling and the Sciences of Mind David Herman,2017-02-24 An transdisciplinary exploration of narrative not just as a target for interpretation but also as a means for making sense of experience itself With Storytelling and the Sciences of Mind David Herman proposes a cross fertilization between the study of narrative and research on intelligent behavior This cross fertilization goes beyond the simple importing of ideas from the sciences of mind into scholarship on narrative and instead aims for convergence between work in narrative studies and research in the cognitive sciences The book as a whole centers on two questions How do people make sense of stories And How do people use stories to make sense of the world Examining narratives from different periods and across multiple media and genres Herman shows how traditions of narrative research can help shape ways of formulating and addressing questions about intelligent activity and vice versa Using case studies that range from Robert Louis Stevenson s Dr Jekyll and Mr Hyde to sequences from The Incredible Hulk comics to narratives told in everyday interaction Herman considers storytelling both as a target for interpretation and as a resource for making sense of experience itself In doing so he puts ideas from narrative scholarship into dialogue with such fields as psycholinguistics philosophy of mind and cognitive social and ecological psychology After exploring ways in which interpreters of stories can use textual cues to build narrative worlds or storyworlds Herman investigates how this process of narrative worldmaking in turn supports efforts to understand and engage with the conduct of persons among other aspects of lived experience
