this communication is the context in which wrongs can be transformed into rights Ethics do however also shape existing recognized human rights Human rights are ethics in action The enforcement of human rights especially in international criminal law as well as the implementation structures bring the ideas and principles of rights to life in a globalized world Thus it is advisable to take an interdisciplinary approach to participation rights social rights and human rights in general in private and in public life This work contains articles that were presented at an international and interdisciplinary conference on Ethics and Human Rights in a Globalized World in Jerusalem in the fall of 2008 Young researchers from Israel and Germany who work in the fields of law philosophy political science and theology deal with the foundation of human rights the conflict between varying human rights and effective implementation structures The part played by the World Bank in implementing human rights is highlighted as is the significance of local cultural backgrounds Other articles deal with the correlation of international criminal law and human rights The book also contains an article by Aharon Barak former Chief Justice of the Israel Supreme Court *News Discourse* Monika Bednarek, Helen Caple, 2012-06-28 Cutting edge introduction to news discourse offering an authoritative guide to analyzing language and images and in print and online *Regulating Platforms* Terry Flew, 2021-11-30 We once thought of cyberspace as a borderless world As the internet has become increasingly platformized with a small number of technology giants that dominate the global digital economy concerns about information monopolies hateful online content and the impact on media content creators and creative industries have become more marked Consequently governments politicians and civil society are questioning how digital platforms can or should be regulated In this up to the minute study Terry Flew engages with important questions surrounding platform regulation Starting from the premise that governance is an inherent feature of digital platforms he argues that the challenge is to develop the best frameworks for balancing external regulatory oversight with the internal governance practices of platform companies The intersection of media policy information policy and economic policy is an important element of policy frameworks as national authorities increasingly seek to engage with the power of global digital platforms Lively and accessible *Regulating Platforms* is a go to text for students and scholars of media and communication ICCoLLiC 2020 Djatmika , Riyadi Santosa , Tri Wiratno , Fitria Akhmerti Primasita , Dyah Ayu Nila Khrisna, 2020-10-23 ICCoLLiC is an international conference hosted by the English Department Faculty of Cultural Sciences Universitas Sebelas Maret This conference is arranged to become an annual conference making room for scholars and practitioners in the area of communication language literature and culture to share their thoughts knowledge and recent researches in the field of study

The Internet Lelia Green, 2010-05-01 Life without the internet a very new technology seems almost unimaginable for most people in western nations Today the internet is intrinsic to media and communications entertainment politics defence business banking education and administrative systems as well as to social interaction The Internet disentangles this extraordinarily complex information and communication technology from its place in our daily lives allowing it to be

examined anew Technology has historically been shaped by governmental military and commercial requirements but the development of the internet is increasingly driven by its users YouTube Facebook Twitter Flickr and many other emerging applications are shifting the way we express ourselves communicate with our friends and even engage with global politics At the same time three quarters of the world s population remain effectively excluded from the internet Packed with case studies drawn from around the world The Internet presents a clear and up to date introduction to the social cultural technological and political worlds this new media form is creating

Remediating McLuhan Richard Cavell, 2025-10-01 While current scholarly interest has assured Marshall McLuhan s 1911-80 foundational status as a media theorist much room still exists for further exploration of his writings which have taken on additional layers of significance in our contemporary digital moment Holding that media were extensions of the human McLuhan also posited that the human was a product of technology Ranging across fields as diverse as art history biotechnology and beyond this collection of essays considers McLuhan s ground breaking approach within a number of new contexts and explores the distinguishing features of his media theory

Sound Streams Andrew J Bottomley, 2020-06-01 In talking about contemporary media we often use a language of newness applying words like revolution and disruption Yet the emergence of new sound media technologies and content from the earliest internet radio broadcasts to the development of algorithmic music services and the origins of podcasting are not a disruption but a continuation of the century long history of radio Today s most innovative media makers are reintroducing forms of audio storytelling from radio s past Sound Streams is the first book to historicize radio internet convergence from the early 90s through the present demonstrating how so called new media represent an evolutionary shift that is nevertheless historically consistent with earlier modes of broadcasting Various iterations of internet radio from streaming audio to podcasting are all new radio practices rather than each being a separate new medium radio is any sound media that is purposefully crafted to be heard by an audience Rather than a particular set of technologies or textual conventions web based broadcasting combines unique practices and features and ideas from radio history In addition there exists a distinctive conversationality and reflexivity to radio talk including a propensity for personal stories and emotional disclosure that suits networked digital media culture What media convergence has done is extend and intensify radio s logics of connectivity and sharing sonically mediated personal expression intended for public consideration abounds in online media networks Sound Streams marks a significant contribution to digital media and internet studies Its mix of cultural history industry research and genre and formal analysis especially of contemporary audio storytelling will appeal to media scholars radio and podcast practitioners audio journalism students and dedicated podcast fans
