"Trading Magic for Fact," Fact for Magic Marc Colavincenzo,2021-10-18 This study brings together three major areas of interest history postmodern fiction and myth Whereas neither history and postmodern fiction nor history and myth are strangers to one another postmodernism and myth are odd bedfellows For many critics postmodern thought with its resistance to metanarratives stands in direct and deliberate contrast to myth with its apparent tendency to explain the world by means of neat complete narratives There is a strain of postmodern Canadian historical fiction in which myth actually forms a complement not only to postmodernism s suspicion of master narratives but also to its privileging of those marginal and at times ignored areas of history The fourteen works of Canadian fiction considered demonstrate a doubled impulse which at first glance seems contradictory On the one hand they go about demythologizing in the Barthesian sense various elements of historical discourse exposing its authority as not simply a natural given but as a construct This includes the fact that the view of history portrayed in the fiction has been either underrepresented or suppressed by official historiography On the other hand the history is then re mythologized in that it becomes part of a pre existing myth its mythic elements are foregrounded myth and magic are woven into the narrative or it is portrayed as extraordinary in some way The result is an empowering of these histories for the future they

are made larger than life and unforgettable      **Rituals and Ritual Theory in Ancient Israel** Ithamar

Gruenwald, 2003-01-20 This book in many ways the first of its kind addresses the issue of rituals and their embedded ritual theory in the religion of ancient Israel The leading idea of the book is that rituals are an autonomous form of expression of the human mind The human mind expresses itself in rituals as it does in language the arts and mathematics Rituals are not performative translations of symbols and ideas and in religion of any kind of theology Theology does not explain how rituals are done and how they accomplish what they claim to do The book begins with a general discussion of what rituals are and argues that the ritual theory of each ritual is not in any general theory of ritual but embedded in the ritual act itself Every ritual is structured in such a way that its details create the behavioural logic that makes ritual work The difference is explored between the early and institutionalised phases of the religion of ancient Israel Here the role of the economic ethos is the focus of the discussion The book explores the links between myth and rituals arguing that the connectedness with ritual endows a story with a myth essence Detailed discussions of various rituals exemplify the major theoretical discourse The book is of interest to scholars in the areas of Halakhah law and ritual religious studies and the anthropology of religion

The first accessible reader on magic's generative relationship with contemporary art practice From the hexing of presidents to a renewed interest in herbalism and atavistic forms of self care magic has furnished the contemporary imagination with mysterious and often disorienting bodies of arcane thought and practice This volume brings together writings by artists magicians historians and theorists that illuminate the vibrant correspondences animating contemporary art's varied encounters with magical culture inspiring a reconsideration of the relationship between the symbolic and the pragmatic Dispensing with simple narratives of rechantment Magic illustrates the intricate ways in which we have to some extent always been captivated by the allure of the numinous It demonstrates how magical culture's tendencies toward secrecy occlusion and encryption might provide contemporary artists with strategies of remedial communality a renewed faith in the invocational power of personal testimony and a poetics of practice that could boldly question our political circumstances from the crisis of climate collapse to the strictures of socially sanctioned techniques of medical and psychiatric care Tracing its various emergences through the shadows of modernity the circuitries of ritual media and declarations of psychic self defence Magic deciphers the evolution of a magical critical thinking that productively complicates contradicts and expands the boundaries of our increasingly weird present      *Before Mickey* Donald Crafton, 2015-04-01 This witty and fascinating study reminds us that there was animation before Disney about thirty years of creativity and experimentation flourishing in such extraordinary work as Girdie the Dinosaur and Felix the Cat Before Mickey the first and only in depth history of animation

from 1898 1928 includes accounts of mechanical ingenuity marketing and art Crafton is equally adept at explaining techniques of sketching and camera work evoking characteristic styles of such pioneering animators as Winsor McCay and Ladislav Starevitch placing work in its social and economic context and unraveling the aesthetic impact of specific cartoons Before Mickey's scholarship is quite lively and its descriptions are evocative and often funny The history of animation coexisted with that of live action film but has never been given as much attention Tim Hunter New York Times

**Magical Realism and Deleuze** Eva Aldea,2011-02-10

**Making Magic** Randall Styers,2004-01-15 Since the emergence of religious studies and the social sciences as academic disciplines the concept of magic has played a major role in defining religion and in mediating the relation of religion to science Across these disciplines magic has regularly been configured as a definitively non modern phenomenon juxtaposed to distinctly modern models of religion and science Yet this notion of magic has remained stubbornly amorphous In Making Magic Randall Styers seeks to account for the extraordinary vitality of scholarly discourse purporting to define and explain magic despite its failure to do just that He argues that this persistence can best be explained in light of the Western drive to establish and secure distinctive norms for modern identity norms based on narrow forms of instrumental rationality industrious labor rigidly defined sexual roles and the containment of wayward forms of desire Magic has served to designate a form of alterity or deviance against which dominant Western notions of appropriate religious piety legitimate scientific rationality and orderly social relations are brought into relief Scholars have found magic an invaluable tool in their efforts to define the appropriate boundaries of religion and science On a broader level says Styers magical thinking has served as an important foil for modernity itself Debates over the nature of magic have offered a particularly rich site at which scholars have worked to define and to contest the nature of modernity and norms for life in the modern world
