Politics Of Ballistic Missile Nonproliferation:

The Politics of Ballistic Missile Nonproliferation W. Bowen, 2000-01-20 During the presidency of George Bush 1989-93 the proliferation of nuclear chemical and biological weapons and the ballistic missiles capable of delivering them rose greatly in significance as issues on the American security agenda In the missile field this became evident by the efforts of certain elements in the executive branch and several congressmen to improve domestic and international implementation of the Missile Technology Control Regime The Politics of Ballistic Missile Nonproliferation examines the political bureaucratic and systemic issues that interacted to determine the outcome of these efforts

The Politics of Ballistic Missile Nonproliferation Wyn Q. Bowen, 1997 *Non-Proliferation Export Controls* Daniel Joyner, 2017-03-02 This volume provides a comprehensive and interdisciplinary examination of the Multilateral Non Proliferation Export Control system and the national and international context within which it functions Key features [The Politics of Nuclear Non-Proliferation](#) Ursula Jasper, 2013-10-08 This book examines the puzzle of why some states acquire nuclear weapons whereas others refrain from trying to do so or even renounce them Based on the predominant theoretical thinking in International Relations it is often assumed that nuclear proliferation is inevitable given the anarchic nature of the international system Proliferation is thus often explained by vague references to states insecurity in an anarchic environment Yet elusive generalisations and grand abstract theories inhibit a more profound and detailed knowledge of the very political processes that lead towards nuclearisation or its reversal Drawing upon the philosophical and social theoretical insights of American pragmatism The Politics of Nuclear Non Proliferation provides a theoretically innovative and practically useful framework for the analysis of states nuclear proliferation policies Rather than recounting a parsimonious lean account of proliferation the framework allows for the incorporation of multiple paradigms in order to depict the complex political contestation underlying states proliferation decisions This pragmatist framework of analysis offers ways of overcoming long standing metatheoretical gridlocks in the IR discipline and encourages scholars to reorient their efforts towards imminent real world challenges This book will be of much interest to students of nuclear proliferation international security and IR theory *International Nuclear Export Controls and Non-Proliferation* Ian J. Stewart, 2021-09-27 This book examines the evolution of international nuclear non proliferation trade controls over time The book argues that the international nuclear export controls have developed in a sub optimal way as a result of a non proliferation collective action problem This has resulted in competition among suppliers owing to the absence of an overarching effective system of control While efforts have been undertaken to address this collective action problem and strengthen controls over time these measures have been inherently limited it is argued here because of the same structural factors and vested interests that led to the creation of the problem in the first place This study examines international controls from the beginning of the nuclear age and early efforts to control the atom up to more recent times and the challenge posed by Iranian and North Korean nuclear ambitions Drawing on a rich body of

original archival research and interviews the book demonstrates that the collective action problem has restrained cooperation in preventing nuclear proliferation and that gaps persist in the international nuclear trade control regime This book will be of much interest to students of nuclear proliferation and arms control security studies and International Relations

Tuning Priorities in Nuclear Arms Control and Non-Proliferation A. Nikitin, M.B. Mærli, 2008-02-28 This publication contributes to the discussion about better understanding and mutual tuning of Russian and Western approaches to strengthening the nuclear non proliferation regime responding to situations like those in Iran and North Korea synchronizing priorities in the elimination of excessive fissile materials and most of all in the preservation of existing and the development of new agreements in nuclear arms control and nuclear disarmament An important aspect of this is raising awareness of the current crisis in nuclear arms control Such international inter agency and cross cultural dialogue provides an opportunity for maintaining the wide ranging dialogue required for strengthening arms control arrangements and for establishing new ones with clearly defined and measurable scopes and verification systems

Avoiding the Abyss Barry R. Schneider, Jim A. Davis, 2006-05-30 In December 1993 Secretary of Defense Les Aspin announced the Counterproliferation Initiative a response to President Clinton s assertion that if we do not stem the proliferation of the world s deadliest weapons no democracy can feel secure This timely book brings together contributions from a wide range of experts to help readers understand how far the nation has come since then and what still needs to happen Insightful essays examine arms control treaty programs export control regimes interdiction diplomatic economic political persuasion and sanctions deterrence counterforce active and passive defense and consequence management Many positive changes have occurred since 1993 Regime changes in Iraq and South Africa have removed some WMD proliferation threats Saddam Hussein has been overthrown and a new Iraq is beginning to emerge South Africa s clandestine WMD program has apparently ended Libya announced it has given up its efforts to have active WMD programs The Taliban and al Qaeda have been routed in Afghanistan probably delaying efforts to develop or buy WMD Yet states continue to develop and export WMD and or their delivery systems As many as 30 states are still believed to have either a nuclear biological or chemical weapons program Some have all three India and Pakistan have acknowledged programs Abdul Qadeer Khan the scientist who directed the Pakistani A bomb program has admitted selling nuclear weapons designs and nuclear enrichment equipment to Libya Iran and North Korea His colleagues have held discussions with al Qaeda representatives Ayman Al Zawahiri number two in the al Qaeda chain of command claims that the terrorist organization has several suitcase A bombs from the Former Soviet Union It appears clear to many that Iran has a desire to develop nuclear weapons Syria still has a chemical weapons program North Korea s WMD profile has escalated As *Avoiding the Abyss* so convincingly demonstrates much has been accomplished since the Counterproliferation Initiative was launched but much

work still lies ahead It is an important story for every American

Containing Missile Proliferation Dinshaw

Mistry,2011-12-01 The proliferation of ballistic missiles that can deliver weapons of mass destruction halfway across the world is a matter of growing urgency and concern as is the fate of agreements limiting the development of such deadly weapons The Bush administration s scrapping of the ABM Treaty and pursuit of a huge National Missile Defense initiative are dramatic evidence of this concern Yet there remains much uncertainty about the viability of missile defense If defenses fall short strong security regimes will be necessary to contain missile proliferation Since 1987 more than thirty states have agreed to restrict their transfer of missiles and related technologies under the Missile Technology Control Regime MTCR During the MTCR s first decade several regional powers were thwarted from advancing their missile ambitions Subsequently however states such as North Korea Iran Pakistan India and Israel have tested medium range missiles and others have expanded their missile arsenals Dinshaw Mistry critically examines the successes and limitations of the MTCR and suggests five practical ways to strengthen the regime The author s exhaustive research offers new and detailed insights on the technology and politics of missile programs in Iran Iraq North Korea Pakistan India Israel Egypt South Korea Taiwan and other countries Mistry also shows how international cooperation security regimes and U S foreign policies of engagement and containment with these states can halt their missile programs Mistry s book is the first comprehensive study of the MTCR and of international efforts to contain missile proliferation Policymakers scholars and the general reader will find this book a valuable contribution to the subjects of arms control ballistic missile proliferation multilateral cooperation and international security regimes For the author s update go to <http://www.washington.edu/uwpress/books/UpdateApril2009.pdf>

The Globalization of Political Violence Richard Devetak,Christopher W. Hughes,2007-12-18 The events of the 11th of September 2001 revealed most dramatically that globalization has a shadow While large sections of the world s population enjoy the perceived benefits of globalization others seek to utilize globalization for their own politically violent purposes If 9 11 demonstrated anything it is that globalization can as readily facilitate violence and insecurity as it can produce stability prosperity and political order This edited volume offers important new methodological and multi disciplinary insights into the study of globalization and political violence It brings together studies from various disciplines in order to address the precise nature of the relationship between globalization and political violence as it seeks to offer new theoretical and empirical understandings of the types of actors involved in political violence either as perpetrators or victims Examples of the studies include the changing character of state militaries and state to state conflict under globalization the emergence of new wars fuelled by globalization the role of state militaries in intervention new forms of violence directed by states against refugees and anti globalization protesters the role of terrorist actors post 9 11 networks for the proliferation of weapons of mass destruction and the rise of private military firms amongst others The Globalization of Political Violence will be of interest to students and researchers of politics international relations security studies and international political economy
