Hefferan,2020-08-17 Real property in the form of investment ownership and use pervades almost every aspect of daily lives and represents over 40% of Australia s wealth Such assets do not exist in isolation they are dynamic and forever evolving impacted by a range of physical economic demographic legal and other forces Consequently a true appreciation of individual assets and of the property sector as a whole demands an understanding of both the assets themselves and the context and markets in which they exist The sector is complex and on the face of it confusing It is however not without logic and underlying themes and principles This book provides a wider understanding of how the real property sector works It covers topics such as the nature of real property and its functions economic drivers valuation principles legal and tenure parameters property taxation land development and subdivision asset and property management and sustainability all critical components in this complex and critically important sector It provides a wide and balanced perspective for experienced practitioners investors students and anyone involved in property decision making or wishing to secure a deeper understanding of these areas The book integrates research based theory with practical application and first hand insights into a sector that underpins the Australian economy its communities and its sustainability Recommendations for Database Management System Standards FIPS Task Group on Database Management System Standards (U.S.),1979
