Imagined Truths Mary L. Coffey, Margot Versteeg, 2019-05-09 Imagined Truths provides a twenty first century analysis of stylistic and philosophical manifestations of nineteenth and twentieth century Spanish literary realism Bringing together the work of the foremost specialists in the field of contemporary Spanish letters this collection offers new approaches to literary and cultural criticism and reveals how Spanish realism far from imitative of other European movements engaged in complex and modern concepts of representation and mimesis Imagined Truths acknowledges the critical importance of women writers and contemporary approaches to questions of gender The essays address the impact of economics on our perceptions of reality and our constructions of everyday life and they argue for the importance of emotions in the social construction of individual identity Most importantly the essays acknowledge the post imperial turn in literary studies Addressing a broad range of authors works and topics including the continued relevance of Cervantes s Don Quijote and the way Spanish realism moved beyond narrative to inhabit the spaces of both theatre and film Imagined Truths comprises a series of meditations on new ways of understanding the unique place of realism in Spanish cultural history Offering insights for specialists in a wide range of disciplines literature cultural studies gender studies history philosophy this collection is equally important for readers just becoming acquainted with realist narrative as a central component of Spanish literary history [Landscapes of Realism](#) Dirk Göttsche, Rosa Mucignat, Robert Weninger, 2021-04-15 Few literary phenomena are as elusive and yet as persistent as realism While it responds to the perennial impulse to use literature to reflect on experience it

also designates a specific set of literary and artistic practices that emerged in response to Western modernity

Landscapes of Realism is a two volume collaborative interdisciplinary exploration of this vast territory bringing together leading edge new criticism on the realist paradigms that were first articulated in nineteenth century Europe but have since gone on globally to transform the literary landscape Tracing the manifold ways in which these paradigms are developed discussed and contested across time space cultures and media this first volume tackles in its five core essays and twenty five case studies such questions as why realism emerged when it did why and how it developed such a transformative dynamic across languages to what extent realist poetics remain central to art and popular culture after 1900 and how generally to reassess realism from a twenty first century comparative perspective

The Concept of Modernism Astradur Eysteinnsson, 2018-07-05 The term modernism is central to any discussion of twentieth century literature and critical theory Astradur Eysteinnsson here maintains that the concept of modernism does not emerge directly from the literature it subsumes but is in fact a product of critical practices relating to nontraditional literature Intervening in these practices and correlating them with modernist works and with modern literary theory Eysteinnsson undertakes a comprehensive reexamination of the idea of modernism Eysteinnsson critically explores various manifestations of modernism in a rich array of American British and European literature criticism and theory He first examines many modernist paradigms detecting in them a conflict between modernism's culturally subversive potential and its relatively conservative status as a formalist project He then considers these paradigms as interpretations and fabrications of literary history Seen in this light modernism both signals a historical change on the literary scene and implies the context of that change Laden with the implications of tradition and modernity modernism fills its major function that of highlighting and defining the complex relations between history and postrealist literature Eysteinnsson focuses on the ways in which the concept of modernism directs our understanding of literature and literary history and influences our judgment of experimental and postrealist works in literature and art He discusses in detail the relation of modernism to the key concepts postmodernism the avant garde and realism Enacting a crisis of subject and reference modernism is not so much a form of discourse he asserts as its interruption a possible other modernity that reveals critical aspects of our social and linguistic experience in Western culture Comparatists literary theorists cultural historians and others interested in twentieth century literature and art will profit from this provocative book
