**Narrative Impact** Melanie C. Green, Jeffrey J. Strange, Timothy C. Brock, 2003-01-30 The impact of public narratives has been so broad including effects on beliefs and behavior but extending beyond to emotion and personality that the stakeholders in the process have been located across disciplines institutions governments and indeed across epochs Narrative Impact draws upon scholars in diverse branches of psychology and media research to explore the subjective experience of public narratives the affordances of the narrative environment and the roles played by narratives in both personal and collective spheres The book brings together current theory and research presented primarily from an empirical psychological and communications perspective as well as contributions from literary theory sociology and censorship studies To be commensurate with the broad scope of influence of public narratives the book includes the narrative mobilization of major social movements the formation of self concepts in young people banning of texts in schools the constraining impact of narratives on jurors in the court room and the wide use of education entertainment to affect social changes Taken together the interdisciplinary nature of the book and its stellar list of contributors set it apart from many edited volumes Narrative Impact will draw readership from various fields including sociology literary studies and curriculum policy Providing new explanatory concepts this book is the first account on the psychology of narrative persuasion and brings together the relevant conceptualizations from within various sectors of psychology together with the major issues that concern cognate disciplines outside of psychology focuses on understanding the mechanisms that underlie the power of public narratives to achieve broad historical and social changes offers breakthroughs to the future the role of presence in virtual reality narratives the role of zines in females fashioning of their selves and the central role of imagery in transportation into narrative worlds

explains varying roles of emotion in narrative immersion and addresses the growing blurring of fact and fiction mechanisms and implications for beliefs and behavior , **Glow Kids** Nicholas Kardaras,2016-08-09 In *Glow Kids* Dr Nicholas Kardaras will examine how technology more specifically age inappropriate screen tech with all of its glowing ubiquity has profoundly affected the brains of an entire generation Brain imaging research is showing that stimulating glowing screens are as dopaminergic dopamine activating to the brain s pleasure center as sex And a growing mountain of clinical research correlates screen tech with disorders like ADHD addiction anxiety depression increased aggression and even psychosis Most shocking of all recent brain imaging studies conclusively show that excessive screen exposure can neurologically damage a young person s developing brain in the same way that cocaine addiction can Design for Emergence Yanna Vogiazou,2007 *Design for Emergence* investigates spontaneous unpredictable uses of technology that are driven by social contexts and collaborative processes based on our ability to communicate our presence both virtual and physical in symbolic ways In light of the fact that social dynamics and unexpected uses of technology can inspire innovation this book proposes a research model of design for emergence focusing on emergent phenomena as part of an iterative design process By providing playful technology mediated experiences with minimal structure unpredictable user behaviours can emerge through exploration resulting in a richer and more complex social experience The research methodology is practice based two interactive prototypes were designed implemented and evaluated in different contexts an online multiplayer BumperCar game and a wireless location based urban game of tag called CitiTag User studies showed that collaborative spontaneous play can enhance the sense of social participation in a group activity Collective and individual behaviours and creative uses of technology emerged from a simply designed application based on symbolic presence both in the virtual and the physical world CitiTag experiments showed that virtual elements in a mixed reality game can instigate novel experiences in the context of our everyday physical and social environment with often unexpected results The observed emergent behaviours are personal and collective extensions of the virtual experience in the real world The book concludes with a positive view of ubiquitous and social computing in which the virtual world becomes a first class citizen rather than a substitute for the real world creating new situations and engaging experiences in the setting of our daily life that were not possible before
