Reason and Teaching (Routledge Revivals) Israel Scheffler, 2014-04-08 This title first published in 1973 brings together a variety of papers by Israel Scheffler one of America's leading educational philosophers. The essays each stress the importance of critical thought and independent judgement to the organization of educational activities. In the first section Scheffler adopts a metaphilosophical approach emphasizing the role of philosophy in educational thought. A number of key concepts are dealt with next including the study of education and its relation to theoretical disciplines philosophical interpretations of teaching and the education of teachers. The final section is critical and deals with the writings of several key thinkers in the field. A broad and authoritative study this reissue will provide any Philosophy student with an essential background to the criticism and theories surrounding the philosophy of education **Educational**

Judgments (International Library of the Philosophy of Education Volume 9) F. Doyle James, 2010-02-25 The topics covered in this volume originally published in 1973 include the need for a more adequate concept or definition of education the issue of whether indoctrination is compatible with education particularly with moral education and the processes of judging the merits of different approaches to aesthetic education. Two contributors present complementary analyses of the relations between freedom as a characteristic of institutions and the process of learning to be a free man. There is discussion of the neglected subject of rights and duties in education with special emphasis on the question of a universal right to education. The volume concludes with papers on the relevance of philosophy to the practical judgments of educators and to education as a field of study **Education and the Development of Reason (International Library of the Philosophy of Education Volume 8)** R.F. Dearden, Paul H. Hirst, R.S. Peters, 2010-02-25 Deals with the nature of education and discusses various general aims such as mental health socialization and creativity which have been thought to characterize it. This book examines the nature of reason and its relationship to feeling will and action. It considers the development of different aspects of reason in an educational context **Philosophical Analysis and Education (International Library of the Philosophy of Education Volume 1)** Reginald Archambault, 2010-02-25 When originally published in 1965 this book reflected some of the new thinking among philosophers regarding the role of the discipline in its investigation of central issues in education. The essays are grouped into four major sections: The Nature and Function of Educational Theory; The

Context of Educational Discussion Conceptions of Teaching and The Essence of Education The concepts dealt with are of the first importance to any practical or theoretical discussion in education and the editor provides a generous introduction to the essays to aid the reader in his analysis of the issues *Concepts of Indoctrination (International Library of the Philosophy of Education Volume 20)* Ivan A. Snook, 2010-02-25 Indoctrination is an important concept in educational philosophy It bears on many areas of study including ethics epistemology and philosophy of science and opens up new paths of investigation into such questions as classroom method and the rights of parents and their children This volume combines both American and English interpretations of a crucial idea in the philosophy of education and helps bridge the gap between the teaching of the subject in the USA and the UK **The Concept of Education (International Library of the Philosophy of Education Volume 17)** R.S. Peters, 2010-02-25 A series of public lectures given at the Institute of Education University of London provides the nucleus around which this collection originally published in 1967 is gathered This collection provides comprehensive coverage of a complex theme which will be of interest to those involved in the fields of philosophy and education alike Topics covered include the logical and psychological aspects of learning the concept of play rule and routines teaching and training philosophical models of teaching *Education and the Education of Teachers (International Library of the Philosophy of Education Volume 18)* R.S. Peters, 2010-02-25 This collection of important and significant papers examines a wide range of issues with R S Peter s customary incisiveness and clarity One of the author s main concerns is to clarify the meaning of education and quality in education a phrase often used in public debate but seldom scrutinized Long standing ambiguities latent in the concept of liberal education are also exposed and Herbert Spencer s question What knowledge is of most worth vital in the light of the recent vast development of knowledge is considered **Qualitative Research In Education** Robert R. Sherman, Rodman B. Webb, 2004-08-02 Published in the year 1988 Qualitative Research In Education is a valuable contribution to the field of Education
