Reasoning And Discourse Processes:

Reasoning and Discourse Processes Terry Myers, 1986 Discourse Processes between Reason and Emotion Patrizia Anesa, Aurora Fragonara, 2021-05-08 This book addresses different forms of discourse by analysing the emergence of power dynamics in communication and their importance in shaping the production and reception of messages The chapters focus on specific cognitive aspects such as the verbal expression of reasoning or emotions as well as on linguistic and discursive processes The interaction between reasoning feelings and emotions is described in relation to several fields of discourse where power dynamics may emerge and includes among others political media and academic discourse This volume aims to include representative instances of this heterogeneity and is deeply rooted both theoretically and methodologically in the acknowledgment that the investigation of the complex interaction between reason and emotion in discursive productions cannot be exempt from the adoption of a multi disciplinary perspective By providing a critical reflection of their methodological decisions and describing the implications of their research projects the contributors offer insights which are relevant for students researchers and practitioners operating in the broad field of discourse studies *Mental Logic* Martin D.S. Braine, David P. O'Brien, 1998-04-01 Over the past decade the question of whether there is a mental logic has become subject to considerable debate There have been attacks by critics who believe that all reasoning uses mental models and return attacks on mental models theory This controversy has invaded various journals and has created issues between mental logic and the biases and heuristics approach to reasoning and the content dependent theorists However despite its pertinence to current issues in cognition few cognitive scientists really know what the mental logic theory is and misapprehensions are prevalent This volume is a comprehensive presentation of the theory of mental logic and its implications for cognition and development including the acquisition of language The theory offered here has three parts Part I is the mental logic per se that contains a set of inference schemas Part II is a reasoning program that applies the schemas in lines of reasoning including a direct reasoning routine and more sophisticated indirect reasoning strategies Part III of the theory is pragmatic proposing that the basic meaning of each logic particle is in the inferences that are sanctioned by its inference schemas *Mechanisms of Everyday Cognition* James M. Puckett, Hayne W. Reese, 2018-10-24 Based on the proceedings of the twelfth biennial conference on life span developmental psychology most of the contributions in this volume deal with the mechanisms of everyday cognition However a broad spectrum of additional concerns is addressed within the domain of everyday cognition its metatheoretical underpinnings theory and theoretical issues methods of investigation empirical considerations and social issues and applications Addressing everyday cognition in infancy childhood adolescence young and middle adulthood and old age this book is consistent with the chronological life span theme of this series The contributors collectively discuss some of the traditional concerns of life span psychology the dialectical nature of everyday cognition individual differences and contextual influences Leading and concluding chapters provide overview

integration and summary In bringing together a wide array of age periods and points of view within the domain of everyday cognition the editors hope that students and researchers in developmental psychology and cognitive science will find a useful cross fertilization of ideas A huge variety of theoretical perspectives is presented ranging from the position that everyday cognition and academic laboratory cognition are different manifestations of the same underlying processes to the position that the underlying processes are completely separate Also of importance a large assortment of research methods is illustrated including interviews laboratory simulations real life observations and psychometric methods
