Reassessing American Competitiveness:

Reassessing American Competitiveness Peter Morici,1988 **Making Free Trade Work** Peter Morici,1990

Regulating Unfair Trade Pietro S. Nivola,2010-12-01 In the early 1980s American complaints about unfair trade practices began to intensify Sunrise industries such as manufacturers of semiconductors and telecommunications equipment joined older complainants including steel and textile producers in seeking more safeguards against international competitors who priced their products too aggressively or whose governments subsidized exports or protected home markets In this politically charged atmosphere the U S government has devised increasingly stringent regulatory programs to address the claimed abuses and distortions In this book Pietro Nivola examines the strenuous effort to combat the objectionable trading practices of other countries Through most of the postwar period Nivola notes policymakers had deemed it in the nation s economic and strategic interests to tolerate asymmetries and infractions in the international trading order But that tolerance has been sharply lowered by heightened sensitivity to inequities and a growing conviction that government should intervene frequently and forcefully to ensure a level playing field The book maintains that foreign protectionism lower East West tensions and alleged American decline in the face of international competition cannot fully explain the stiffening regulation of unfair trade The world trading system Nivola contends is not more restrictive now than it was earlier Cries about foreign commercial transgressions in recent years have remained shrill despite a formidable U S export boom and an improved current account valance Much of the U S regulatory activity has acquired a political momentum of its own The activity has increased not just because global competitive pressures have generally intensified but because we have developed more ways and inducement to complain about those pressures Nivola cautions that trade regulations now bears too much of the burden for ameliorating economic imbalances and deficiencies The tendency a [Making North America Competitive](#) Lansing Lamont,Gary Levy,1989 [The Cambridge Economic History of the United States](#) Stanley L. sociology communication and media studies and contemporary philosophy Pacific Basin Industries in Distress Hugh Patrick, 1991-12-09 Pacific Basin Industries in Distress **A New Special Relationship** Peter Morici, 1991 This study examines from an American perspective the impact of the free trade agreement FTA on the evolution of the Canada United States economic relationship It puts into historical context the special trading relationship between Canada and the United States which prevailed over the early postwar period It examines how FTA rules and dispute settlement procedures create an effective basis for managing bilateral economic relationships in the context of more decentralized policy processes It also explores the potential impact on the bilateral trading regime of the changing nature of international competition the adjustments taking place in the structure of the Canadian and American economies and the challenges posed by continuing technological change **The Premise and the Promise** , 1992-01-01 The vision of a hemispheric system of free trade charts a bold new course for U S Latin American relations that promises to transform the economic and political landscape of the hemisphere well into the next century In *The Premise and the Promise* analysts from the United States Latin America and Canada explore the dynamics of the process under way in the Americas today what features free trade ought to have how the process of regional integration should proceed and how the regional architecture should be related to the international trading system Mexico's decision to seek a free trade agreement with the United States and Washington's announcement of the Enterprise for the Americas Initiative turned the incipient integrationist revival of the mid 1980s in Latin America into a seemingly unstoppable force If regionalism is to be a benign force however it must overcome the impulse toward closed exclusionary arrangements and emulate the best features of the multilateral approach a regional arrangement should be flexible enough to accommodate vast regional diversity inclusive enough to allow all countries in the region to participate and efficient enough not to impose unduly large costs on those excluded from the arrangement The contents include Sylvia Saborio Overview The Long and Winding Road from Anchorage to Patagonia Peter Morici American Free Trade A U S Perspective Jos Salazar and Eduardo Lizano Free Trade in the Americas A Latin American Perspective Richard Lipsey Getting There A Canadian View on WHFTA's Structure and Refik Erzan and Alexander Yeats Empirical Evidence on the Impact of Free Trade Agreements with the United States on Latin America In six separate chapters analysts weigh the costs and benefits of subregional free trade agreements between the United States and Mexico Chile Central America Caricom the Andean Pact and Mercosur
