Rebirth Of Anthropological Theory:

The Rebirth of Anthropological Theory Stanley R. Barrett, 2016 Attacking the illusion of simplicity which has dominated positivistic approaches and the out dated identification of anthropology with non Western primitive and tribal societies Barrett contends that power and privilege everywhere should be the basic concerns of anthropological inquiry *The Rebirth of Anthropological Theory* Stanley R. Barrett, 1984-01-01 Innovative and often controversial Barrett's study ranges over the entire scope of anthropological theory It provides a fresh interpretation of the history of theory and mounts an alternative perspective built around dialectics that is eminently suitable to post colonial anthropology He argues that anthropological theory has failed to be cumulative It has been characterized by oscillation and repetition theoretical orientations have appeared and disappeared only to be discovered once again Addressing numerous conceptual contradictions which have never been resolved he introduces novel concepts such as salvage theory and backward theory and argues that in many respects anthropological theory resembles the structuralists interpretation of myth Social life he asserts is inherently contradictory although concealed by numerous mechanisms most of which reinforce the status quo Attacking the illusion of simplicity which has dominated positivistic approaches and the out dated identification of anthropology with non Western primitive and tribal societies Barrett contends that power and privilege everywhere should be the basic concerns of anthropological inquiry , **The Many Lives of Transnational Law** Peer

Dustin M. Wax, 2008-01-20 This book breaks new ground in the history of anthropology opening up an explicit examination of anthropology in the Cold War era With historical distance Cold War anthropology has begun to emerge as a distinct field within the discipline This book brings a number of different approaches to bear on the questions raised by anthropology's Cold War history The contributors show how anthropologists became both tools and victims of the Cold War state during the rise of the United States in the post War period Examining the intersection between science and power this book is a compelling read for anthropologists historians sociologists and anyone interested in the way in which colonial and neo colonial knowledge is produced and constructed Stratagems And Spoils F.g. Bailey, 2001-08-07 F G Bailey's classic political anthropology text is reissued here with a Postscript that comments critically on the book's scope its reception and its

uses First published in 1969 Stratagems and Sex and Difference in Ancient Greece and Rome Mark Golden, 2019-07-30 This volume collects and introduces some of the best writing on sexual behaviour and gender differences in ancient Greece and Rome including four chapters newly translated from German and French For centuries discussions of sexuality and gender in the ancient world if they took place at all focussed on how the roles and spheres of the sexes were divided While men occupied the public sphere of the community ranged through the Greek and Roman worlds and participated in politics courts theatre and sport women kept to the home Sex occupied a separate sphere in scholarly terms restricted to specialists in ancient medicine And then the subjects were transformed first by Sir Kenneth Dover then by Michel Foucault This book charts and illustrates the extraordinary evolution of scholarly investigation of a once hidden aspect of the ancient world In doing so it sheds light on fascinating and curious aspects of ancient lives and thought

An Ethnomusicologist's Last Lecture Steven Loza, 2023-12-07 An Ethnomusicologist's Last Lecture Music and Globalism Philosophy and Religion explores the frustration of many scholars and artists with the content and directions of studies on music which continue to be mostly based on Western thought methods theories and even the modes of communicating ideas and mostly through written published works Steven Loza argues that this pattern has pervaded both philosophy and ethnomusicology fields which should be much more globally based in terms of intellectual analysis culturally diverse points of view and the recognition of multiple ways of thinking and doing He criticizes what he perceives as an intellectual hegemony and biased approach to studying music including the standards to which academics are held responsible the manner in which we and our students have had to study music and the forms by which we are pressured to present our findings many times adapting theories and ideas that have nothing to do with the cultures we are examining through a one way microscope and often a distorted lens Loza takes the reader through an assortment of historical and contemporary global examples of musical expression creative artists and thinkers looking for ways that we can assess how music both reflects and enacts culturally diverse peoples beliefs thoughts and world views
