Rebuilding The Matrix Science And Faith In The 21st Century

James K. A. Smith, Amos Yong

Rebuilding The Matrix Science And Faith In The 21st Century:

Rebuilding the Matrix Denis Alexander, 2003 Fresh thinking and new insights on the nature of science in relation to faith showing particularly that 1 true science does not need to be and in fact is not hostile to religious faith and 2 evangelical Christians in general need not be either fearful of nor hostile toward scientific endeavor **Science and Faith in**

Harmony Sy Garte, 2024-02-13 Rather than discord between science and Christian faith there is a harmony as grand as any choral masterpiece The idea that Christianity and science are inextricably in conflict is a relatively recent conception However with each new scientific discovery and scriptural insight it s an idea that s being proved to be insupportable Sy Garte has immersed himself in both science and faith and knows they work beautifully together to sing of the greatness of God Now this respected scientist shares how God s world nature and science and God s word made flesh in Christ are bound together in loving harmony In *Science and Faith in Harmony* Garte examines modern scientific concepts and what they can teach us about theological truths such as the dual nature of Christ He explores the ways in which the terminology and language of science and faith consistently match each other Despite his deep dives into theology and science Garte does not get overly technical in his writing Instead he is personal and passionate speaking directly to readers with a tone of joy and wonder inviting them to join the chorus of praise to the Lord Readers still wondering whether the truths of science and Christian faith are in conflict need this book Following the path of Christ and holding a scientific worldview at the same time is not only possible but also leads to a fuller richer life of harmony and truth **Echoes of Coinherence** W. Ross

Hastings, 2017-07-28 This book re imagines the universe and the scientific study of it through the lens of a triune Creator three persons of irreducible identity in a perichoretic or coinherent communion It modestly proposes that Trinitarian theology and especially the coinherent natures of the Son in the incarnation provides the metaphysic or theory of everything that manifests itself in the subject matter of science The presence of the image of the triune God in humanity and of traces of this God in the non human creation are discussed highlighting ontological resonances between God and creation resonances between the being of God and his creation such as goodness immensity yet particularity intelligibility agency relationality and beauty This Trinitarian reality suggests there should be a similarity also with respect to how we know in theology and science critical realism something reflected in the history of ideas in each These resonances lead to the conclusion that the disciplines of theology and science are in fact coinherent not conflicted This involves recognition of both the mutuality of these vocations and also importantly their particularity Science its own distinct guild yet finds its place ensconced within an encyclopedic theology and subject to first order credal theology **Faith in the Public Realm** Adam Dinham, Robert

Furbey, Vivien Lowndes, 2009-01-28 Faith and religion is a hot topic at the moment and this text explores key issues for faith and religious groups Understanding the role of faith in the policy world is of increasing importance and chapters are arranged around themes which helps students understand the concepts *Has Science Killed God?* Dennis

A. Smith, Amos Yong, 2010-08-26 What might be described as a Pentecostal worldview has become a powerful cultural phenomenon but it is often at odds with modernity and globalization *Science and the Spirit* confronts questions of spirituality in the face of contemporary science The essays in this volume illustrate how Pentecostalism can usefully engage with technology and scientific discovery and consider what might be distinctive about a Pentecostal dialogue with the sciences The authors conclude that Pentecostals with their unique perspectives on spirituality can contribute new insights for a productive interaction between theology and science **A Reasonable God** Arnie Berg, 2010-12-04 The last decade has seen an out pouring of new books by Christian authors that present the scientific evidence for cosmic and biological evolution The significance of these details challenges the traditional theological understanding of creation and urges Christ followers to adopt an evolutionary creationist approach Failure to do so puts science and faith on a collision course *A Reasonable God* identifies the issues synthesizes the viewpoints and encourages readers to step outside their comfort zone and wrestle with some of the ambiguities and uncertainties The book is a great asset for post secondary students who are confronted with the evidences and for church leaders who are looking for a quick way to become better informed *The Liturgy of Creation* Michael LeFebvre, 2019-08-06 How were holidays chosen and taught in biblical Israel and what did they have to do with the creation narrative Michael LeFebvre considers the calendars of the Pentateuch arguing that dates were added to Old Testament narratives not as journalistic details but to teach sacred rhythms of labor and worship LeFebvre then applies this insight to the creation week finding that the days of creation also serve a liturgical purpose
