Recent Advances In The Quantum Theory Of Polymers:

Quantum Theory of Polymers as Solids Janos J. Ladik, 2012-12-06 The goal of this monograph is to summarize the different quantum mechanical methods developed in the last 20 years to treat the electronic structure of polymers. Owing to the nature of the problem these methods consist of a mixture of quantum chemical and solid state physical techniques. The theory described in Part I treats besides the Hartree Fock problem the electron correlation and it has also been developed for disordered polymeric systems. Though for obvious reasons the book could not include all the existing calculations each new method described is illustrated by a few applications with a discussion of the numerical results obtained. Far more details see the Introduction to Part I. The second part contains the theoretical calculation of different properties of polymers based on the methods systematically introduced in the first part. The properties calculated include the electronic and vibrational spectra of polymers and the computation of their transport magnetic and mechanical properties. In cases where reliable experimental data are available the theoretical results are compared with them. *Recent Advances in the Quantum Theory of Polymers. Recent Advances in Liquid Crystalline Polymers L. L. Chapoy, 2012-12-06 This volume contains an eclectic collection of 22 papers on liquid crystalline polymers presented at the Sixth Polymer Workshop in the series sponsored by the European Science Foundation entitled Liquid Crystal Polymer Systems in Gentofte Denmark 12-14 September 1983. Since a contribution to this volume was strictly voluntary and in some cases represents a considerably expanded version of that which was presented it is strictly speaking not correct to term this a proceedings. A description of the aims and purposes of the European Science Foundation with respect to the polymer area has been presented in *Shell Polymers* Vol 5 No 2 pp 34-35 1981. The papers given here represent a cross section of current
