

A tight U.S. labor market in 2019 didn't lead to significant gains at the bottom of the income distribution

Real growth in disposable personal income from 2000 to 2019, divided by income category

Source: U.S. Bureau of Economic Analysis, "Distribution of Personal Income" [2021], available at <https://www.bea.gov/data/special-topics/distribution-of-personal-income>.

Note: Top incomes dipped in 2013 due to the expiration of tax cuts enacted in 2001 and 2003. High-income households retimed the realization of income to take advantage of these cuts, resulting in intentionally higher income in preceding years and intentionally lower income in 2013.

Recent Progress in Random Magnets D. H. Ryan, 1992 Spin glasses exhibit random magnetic ordering as a result of competing interactions such as exchange or anisotropy While they are easily prepared and many of their general properties have been described a detailed understanding of their behaviour is still lacking after more than 30 years of study This book reviews the progress that has been made over the last five years on several aspects of the spin glass problem Unlike several recent books the authors concentrate here on experimental results limiting the theoretical discussion to efforts most directly related to such work The field of spin glasses or more generally random magnets continues to attract the interest of researchers worldwide and the contributions in this book clearly show that this will be the case for many years to come

Recent Advances in Applied Nonlinear Dynamics with Numerical Analysis

Changpin Li, 2013 Nonlinear dynamics is still a hot and challenging topic In this edited book we focus on fractional dynamics infinite dimensional dynamics defined by the partial differential equation network dynamics fractal dynamics and their numerical analysis and simulation Fractional dynamics is a new topic in the research field of nonlinear dynamics which has attracted increasing interest due to its potential applications in the real world such as modeling memory processes and materials In this part basic theory for fractional differential equations and numerical simulations for these equations will be introduced and discussed In the infinite dimensional dynamics part we emphasize on numerical calculation and theoretical analysis including constructing various numerical methods and computing the corresponding limit sets etc In the last part we show interest in network dynamics and fractal dynamics together with numerical simulations as well as their applications

Recent Advances in Differential Geometry and Related Areas Bogdan D. Suceavă, Adara M. Blaga, Marian Ioan Munteanu, Cezar Oniciuc, Shoo Seto, Gabriel-Eduard Vălcu, Lihan Wang, 2025-06-24 This volume contains the proceedings of the AMS Special Session on Recent Advances in Differential Geometry held virtually on April 12 2023 and the Tenth Congress of Romanian Mathematicians Special Session on Recent Advances in the Geometry of Submanifolds held on June 30 July 5 2023 in Pitești Romania In the last two decades various techniques produced new results in differential geometry and many of them focused on the geometry of submanifolds where one of the most important questions the Willmore conjecture was solved in 2012 by A Neves and F Coda Marques This invites a reflection on the new trends and research directions that contemporary differential geometry might and will take in its natural development Some of the most important advances have been obtained by using techniques in geometric analysis while others have been using more classical methods which are still of interest Motivated by these new developments the present volume intends to bring together various viewpoints on the recent study of representing the fundamental idea of space in differential geometry Of particular interest are the results focused on minimal submanifolds and their generalizations and the related concept of harmonic mappings and their generalizations In preparing this volume the editors were particularly interested in the study of curvature functionals in various contexts from comparison geometry to new curvature invariants relations between curvature and topology as well as other related topics
