Recession Crime And Punishment:

Recession, Crime and Punishment Steven Box, 1987-08-21 We are often told that unemployment is no excuse for committing crimes. It certainly does not follow as many in government would have us believe that crime is unrelated to social conditions. Examining a mass of evidence from Great Britain, the United States, Canada, and other industrialised countries, Steven Box shows how criminal activity increased with unemployment, poverty, and sharpened competition between firms. He demonstrates that corporate as well as individual crime is affected by the experience of recession and that changing pressures and opportunities alter the character and distribution of deviance as well as increasing its incidence. Although deterioration in material circumstances does lead to more crime, however, it does not alone account for the massive increase in prison populations or increasingly repressive systems of social control. These developments, the author argues, flow more from government attempts to restructure the labour force and the natural reaction of minor state officials like judges, police, and probation officers to the changing logic of their situations.

Understanding Crime Susan Guarino-Ghezzi, A. Javier Trevino, 2014-09-25 Explores the interdisciplinary nature and potential of the field of criminology, covering the fields of sociology, economics, psychology, biology, philosophy, and religious studies. The conclusion demonstrates various theoretical approaches for policy development and discusses opportunities for incorporating academic contributions into the political process.

Criminology and Political Theory Dr Anthony Amatrudo, 2009-07-09 A lucid, sophisticated, and timely vindication of the importance of Marxist, feminist, and other radical perspectives on the state and political economy to the analysis of crime control and justice. It offers a valuable guide to issues of political philosophy for students and teachers of criminology, critically deconstructing the taken-for-granted categories of law and criminal justice. Professor Robert Reiner, London School of Economics, UK. This clear and concise book sets out the relationship between political theory and criminology. It critically analyzes key theories and debates within criminology and addresses the major political ideas that lie beneath them. Organized around key criminological concepts and issues, the book covers power and ideology, the nature of the state, social control and policing, punishment, economics, and criminal activity, morality. The book has been carefully developed to support practical teaching and learning and contains chapter summaries, further reading, and a comprehensive glossary which combine to provide a full understanding of the themes.
