The Capetians Jim Bradbury, 2007-02-27 Following the demise of the Carolingian dynasty in 987 the French lords chose Hugh Capet as their king He was the founder of a dynasty that lasted until 1328 Although for much of this time the French kings were weak and the kingdom of France was much smaller than it later became the Capetians nevertheless had considerable achievements and also produced outstanding rulers including Philip Augustus and St Louis This wide ranging book throws fascinating light on the history of Medieval France and the development of European monarchy **Rulership in France, 15th-17th Centuries** Ralph E. Giesey, 2024-08-07 The common theme of these essays is the emergence of the modern state in late medieval and renaissance France They examine on the one hand how the image of the king was enhanced in a variety of royal ceremonials as well as in the political writings of Jean Bodin and Cardin le Bret The limits of the sovereign s authority on the other hand were forcefully enunciated in the works of Fran ois Hotman and Th odore de B ze The stability of the monarchy was maintained by the noblesse de robe a new form of hereditary nobility that virtually owned the high judicial and administrative offices they held The last two articles are devoted first to the author s view of the concept of the French king s two bodies and second to the life of his mentor Ernst H Kantorowicz who wrote the seminal work *The King s Two Bodies* **Ideology and Royal Power in Medieval France** William Chester Jordan, 2024-10-28 Ideology and

Royal Power is a collection of essays describing and assessing the ways in which royal publicists in medieval France conceived the authority of the crown especially with regard to protecting and defending its Christian subjects from their alleged enemies at home and abroad corrupt officials Jews particularly moneylenders heretics and Muslims A number of the essays also describe the execution of royal policies with respect to these groups and evaluate their impact both in terms of the groups affected and their influence on further developments in royal ideology A key figure is that of Louis IX Saint Louis r 1226 1270 *Status, Authority and Regional Power* Jane Martindale, 2024-10-28 This volume contains articles covering the centuries between the establishment of Carolingian power in Western Europe and the expansion of the Anglo Norman and Angevin Empire within the French kingdom of the Capetians The common underlying themes of these papers are the exercise of political power and the social position and resources of those who wielded power Aquitaine provides the focus for papers on regional government individual rulers and members of the aristocracy men and some women The most important of the women considered is Eleanor of Aquitaine The political and economic problems which confronted Carolingian kings of this region are discussed and the later contribution of the secular ruler duke prince and count to the peace movement and peace in Aquitaine is reviewed Two articles of wide scope discuss the character of the French aristocracy in the earlier middle ages and consider connections between the acquisition of power and family inheritance patterns The text of a Latin Conventum of the 11th century is printed with a new translation into English while an especially written paper offers revised interpretations of this text which has recently attracted much attention from historians Writing the Early Crusades Marcus Graham Bull, Damien Kempf, 2014 A pioneering approach to contemporary historical writing on the First Crusade looking at the texts as cultural artefacts rather than simply for the evidence they contain The First Crusade 1095 1101 was the stimulus for a substantial boom in Western historical writing in the first decades of the twelfth century beginning with the so called eyewitness accounts of the crusade and extending to numerous second hand treatments in prose and verse From the time when many of these accounts were first assembled in printed form by Jacques Bongars in the early seventeenth century and even more so since their collective appearance in the great nineteenth century compendium of crusade texts the *Recueil des historiens des croisades* narrative histories have come to be regarded as the single most important resource for the academic study of the early crusade movement But our understanding of these texts is still far from satisfactory This ground breaking volume draws together the work of an international team of scholars It tackles the disjuncture between the study of the crusades and the study of medieval history writing setting the agenda for future research into historical narratives about or inspired by crusading The basic premise that informs all the papers is that narrative accounts of crusades and analogous texts should not be primarily understood as repositories of data that contribute to a reconstruction of events but as cultural artefacts that can be interrogated from a wide range of theoretical methodological and thematic perspectives MARCUS BULL is Andrew W Mellon Distinguished Professor of Medieval and
