River Religion:

The Changing World Religion Map Stanley D. Brunn, 2015-02-03 This extensive work explores the changing world of religions, faiths and practices. It discusses a broad range of issues and phenomena that are related to religion, including nature, ethics, secularization, gender and identity. Broadening the context, it studies the interrelation between religion and other fields, including education, business, economics and law. The book presents a vast array of examples to illustrate the changes that have taken place and have led to a new world map of religions. Beginning with an introduction of the concept of the changing world religion map, the book first focuses on nature, ethics and the environment. It examines humankind's eternal search for the sacred and discusses the emergence of green religion as a theme that cuts across many faiths. Next, the book turns to the theme of the pilgrimage, illustrated by many examples from all parts of the world. In its discussion of the interrelation between religion and education, it looks at the role of missionary movements. It explains the relationship between religion, business, economics and law by means of a discussion of legal and moral frameworks and the financial and business issues of religious organizations. The next part of the book explores the many new faces that are part of the religious landscape and culture of the Global North: Europe, Russia, Australia and New Zealand, the U.S. and Canada, and the Global South: Latin America, Africa and Asia. It does so by looking at specific population movements, diasporas and the impact of globalization. The volume next turns to secularization as both a phenomenon occurring in the Global religious North and as an emerging and distinguishing feature in the metropolitan, cosmopolitan and gateway cities and regions in the Global South. The final part of the book explores the changing world of religion in regards to gender and identity issues, the political religious nexus and the new worlds associated with the virtual technologies and visual media. Jordan River Faith Amelia Khatri, 2025-02-14 Jordan River Faith explores the Jordan River's profound religious significance across Judaism, Christianity and Islam, highlighting its role as a nexus of faith for billions. The book delves into the river's portrayal in religious texts, its role in key historical events and its contemporary importance as a site for pilgrimage and spiritual connection. The Jordan River is a powerful symbol of purification, covenant and divine encounter, reflecting shared beliefs and challenging notions of religious division. The book uniquely examines the river's cultural, historical and

environmental dimensions moving beyond theological interpretations It traces the river's significance from ancient times to the present day including the Israelites crossing and John the Baptist's ministry The book is structured to guide the reader through a comprehensive exploration beginning with geography and history delving into religious texts and culminating with an analysis of the river's contemporary relevance

River Cities in Asia Rita Padawangi, Paul Rabé, Adrian Perkasa, 2025-10-01 River Cities in Asia uncovers the intimate relationship between rivers and cities in Asia from a multi disciplinary perspective in the humanities and the social sciences As rivers have shaped human settlement patterns economies culture and rituals so too have humans impacted the flow and health of rivers In Asia the sheer scale of urbanization increases the urgency of addressing challenges facing urban rivers leading to the importance of historically socially and culturally relevant solutions However cities are also uneven landscapes of power affecting chances to achieve holistic ecological approaches The central premise of River Cities in Asia is that a river city is one where proximity between a river and a city exists across time and space natural and social dimensions Recognition of these deep connections can help to better contextualize policy solutions aimed at rivers and their ecologies including human life
