**Rough-Hewn Land** Keith Heyer Meldahl,2013-05 Rough Hewn Land tells the geologic story of the American West the story of its rocks rivers mountains earthquakes and mineral wealth including gold It tells it by taking you on a 1000 mile long field trip across the rough side of the continent from the California coast to the Rocky Mountains This book puts you on the outcrop geologic hammer in hand to explore the evidence for how the spectacular rough hewn lands of the West came to be When North America broke free from Eurasia and Africa some 200 million years ago it triggered a cascade of violent geologic events that shaped the West we see today As the west moving continent crunched across the seabed of the ancient Pacific islands and assorted pieces of ocean floor collected against its prow to build California and plant gold there too Meanwhile mountains squeezed upward from California to Colorado and vast quantities of molten rock seeded the crust with precious metals while spewing volcanic fire across the land Later the land stretched like an accordion to form the washboard like Basin and Range province and Great Basin within it while California began to crackle along the San Andreas fault Throughout the West today a near constant drumroll of earthquakes testifies to a world still reshaping itself in response to the ceaseless movements of the Earth s tectonic plates Rough Hewn Land weaves these stories into the human history of the West As we follow the adventures of John C Fr mont Mark Twain the Donner party and other historic characters we see how geologic forces have shaped human experience just as they direct the fate of the West today *SP035: A Geologic and Natural History Tour Through Nevada and Arizona Along U.S. Highway 93* Joseph V. Tingley,2010 **Building Nevada's Highways** Jennifer E. Riddle,2015 Roads are rarely given a second thought yet are indispensable to life Admittedly a book dedicated to roadways sounds a bit dry But behind every double diamond interchange every pork chop island and every type of asphalt is a fascinating history of the traveling public This book reveals the hidden history of building the Silver State s highways since 1917 The next time you take a road trip across Nevada on the Lincoln Highway US 50 or the Victory Highway US 40 or follow a rutted road to a once booming ghost town think of the ingenious and industrious men and women surveyors engineers chemists and yes even the teams of mules that built the roads we still travel today *The Geotourism Industry in the 21st Century* Bahram Nekouie Sadry,2020-11-01 Here is an engaging overview of the development of definition of and approach to modern geotourism a growing movement to help sustain and showcase the distinctive geographical

characteristics of many places around the world This volume provides a clear conceptual framework with illustrative examples from all corners of the world to better understand abiotic nature based tourism The volume looks at the establishment and effective management of the over 140 UNESCO geoparks around the world and other travel and tourism destinations of interest for their significant historical cultural and frequently stunning physical attributes With studies from a selection of geotourist areas the volume explores urban geotourism mining heritage geomorphological landforms geoheritage based on cultural and historical interest roadside geology of the U S community engagement and volunteer management programs and much more There is even a chapter on space and celestial geotourism **State Oddities** Nancy

Mahoney,Wendy J. Katz,2008-12-01 Although the framework of regionalist studies may seem to be crumbling under the weight of increasing globalization this collection of seventeen essays makes clear that cultivating regionalism lies at the center of the humanist endeavor With interdisciplinary contributions from poets and fiction writers literary historians musicologists and historians of architecture agriculture and women this volume implements some of the most innovative and intriguing approaches to the history and value of regionalism as a category for investigation in the humanities In the volume s inaugural essay Annie Proulx discusses landscapes in American fiction comments on how she constructs characters and interprets current literary trends Edward Watts offers a theory of region that argues for comparisons of the United States to other former colonies of Great Britain including New Zealand Australia and Canada Whether considering a writer s connection to region or the idea of place in exploring what is meant by regionalism these essays uncover an enduring and evolving concept Although the approaches and disciplines vary all are framed within the fundamental premise of the humanities the search to understand what it means to be human
