Robert Stivers Photographs:

Robert Stivers Robert Stivers, A. D. Coleman, 1997 Robert Stivers has explored the nexus of desire and memory in photographs that are hauntingly erotic The images published here also possess a mysterious melancholy feeling and often turn on eroticism and death For Stivers the image is most often about the human figure in space modeled by light often reduced to the simplest forms Embracing the abstract potential of the photograph the artist mines the subconscious in a performative act of seeing and recording This the artist's first book offers a contemplative visual journey The photographs are accompanied by an illuminating essay by A D Coleman Staging Pictures Andy Burgess, 2017-12-20 Robert Stivers is an internationally recognized photographer The images presented here are from Stivers's working Polaroid prints shot with a Hasselblad camera for instant proofing of lighting and composition of his subjects including both models and still lifes usually in a controlled studio setting These previously unseen images photographed in the 1980s and 90s were used as working prints and then long hidden away in the artist's archives Stivers hand worked the surfaces of these Polaroids using various materials to scratch color burn and collage them inspiring him to create his finished exhibition photographs This first edition is limited to 450 copies each signed and numbered by the artist with 40 full color images and a thumbnail index in back of book This is Stivers sixth book to date

Robert Stivers Robert Stivers, 2006 Stivers born 1953 takes us into alcoholic twilight Shuddering exiles in watery purgatory the human figures as well as forests clouds plants works of art and even architecture seem never actually to have existed Each photograph visualizes the anguished lament of the current that runs through him All of this mirrors his dream books and journals where the trials of actual experience and his mind's nocturnal dream machinery are indistinguishable Stivers's pictures are figments of his material philosophy of escape Eugenia Parry

Stories from the Camera Michele M. Penhall, 2016-03-15 The remarkable photography collection of the University of New Mexico Art Museum owes its unique character and quality to the directors curators scholars and artists who have taught worked and studied at the museum and in the university's Department of Art and Art History In this indispensable book these distinguished scholars and artists reflect on the pictures from the collection that hold significance to them Through their own professional and artistic practice they represent different generations of aesthetic voices and intellectual directions As one of the earliest collegiate institutions to begin collecting photography the University of New Mexico Art Museum holds a stunning array of images that span photography's 175 year history In addition to iconic works by famous photographers this book also features less familiar but equally masterful pictures Together these essays represent a unique history of photography and this renowned museum Robert Stivers Robert Stivers, John Wood, 2003 A large volume private exhibition of decadent classicism in contemporary photos This unusual suite of photographs uses the poetic form of Sestina combined with other signature Stivers elements Romanticism mysticism Gothic and Baroque art Symbolism and film With a contemporary edge eerily recalling the past the photos seem dredged up from a seance Named after a complex French poetic

form based upon repetition the Sestina was practiced by Swinburne Kipling and Auden and transformed by Ezra Pound T S Eliot and Elizabeth Bishop Here John Woods poetry illuminates Stivers surreal imagery

Six Stories from the End of Representation James Elkins, 2008 Six Stories is a radically new look at the intersection of science and art through failed images

The Elements of Photography Angela Faris Belt, 2014-06-20 Photography is a complex craft Some excel at the technical side of image making focusing perfectly on the subject releasing the shutter at just the right moment and making exposures with the precise amount of light Others are artists and storytellers capturing a fleeting moment in time which inspires a viewer to gaze upon an image and ponder its meaning The best photographers are masters of both In this highly visual informative new book Angela Faris Belt discusses the four crucial elements of photography that are essential for successful technical and conceptual image making the photographic frame and its borders quality of focus as determined by the aperture or lens shutter speeds and their effects in relation to time and motion the physical media used to create the aggregate image Step by step guidance including informative screen shots traditional darkroom and Photoshop techniques suggested exercises and before and after images help both film and digital photographers improve their skills learn new techniques and better understand their craft More than 300 stunning full color images and portfolios featuring the work of over 40 prestigious artists provide visual inspiration as well as a gorgeous collection of artwork for photography enthusiasts
