Ernesto and in 2007 for Eugenia were integral to developing their skills as educators of the English language in Ecuador. Eugenia Proaño and Ernesto Muñoz had the privilege to undergo _intensive training_ on how to improve their performance as teachers with Ms Mary Scholl. Ms Mary Scholl is the director and founder of Centro Espiral Mana and the Institute for Collaborative Learning which gives aspiring educators the opportunity to hone their pedagogical skills by working with real students who genuinely come to learn and further improve themselves in the English language. Being in Costa Rica and working with Ms Mary Scholl is an experience that demonstrates the values and benefits of working in a student centered class. At the Institute for Collaborative Learning, multi sensory activities including manipulatives, collaboration and heartfelt discussion nurture an environment of creativity and self exploration. Doesn't this encompass all forms of learning? Ernesto Muñoz, Eugenia Proaño and Peter Lindo think so and allow this to be a major element in their classes. These activities all support student acquisition and use of the target language in whatever language a student may be learning and for whichever language a teacher may be teaching. What was achieved in Ecuador as a means to learn English can be applied to learning any language in so many areas of the world. After returning to Ecuador, Eugenia Proaño and Ernesto Muñoz were ready to step outside the comfort zone of traditional language teaching. They decided to apply what they had learned at the Institute for Collaborative Learning in Costa Rica in their classrooms at Universidad Técnica del Norte in Ibarra, Ecuador. They used the procedures they were introduced to with Ms Scholl including visual, auditory, verbal, kinesthetic and tactile among other strategies and techniques. Eugenia Proaño and Ernesto Muñoz worked to apply these methodologies in a student centered collaborative environment that promoted mutual support and respect. The Whispering Seeds manifested in time between stellar Ecuadorian educators, enthusiastic Ecuadorian students and a Bermudian educator who was working at a language school in Brooklyn, New York City. The practices, work and guidance of Eugenia Proaño and Ernesto Muñoz in the classroom were driven by theories and their beliefs about what would work best for university students to be engaged and motivated in learning a foreign language. It was a time to explore and experiment with more innovative techniques. There was just so much potential. This time of experimentation and exploration that Eugenia Proaño and Ernesto Muñoz did show great potential for the students and teachers. We reflected on our daily teaching practices and reformed the practice to be more conducive to language. I Peter Lindo was learning what was happening in Ecuador and could see the potential that this had for the world. To help bring healing, unity, wisdom, knowledge, understanding and love. Estadísticas de pesca, 2005-01-01. The FAO Yearbook of Fishery Statistics: Aquaculture Production is a compilation of statistics on world production of fish, crustaceans, molluscs and other aquatic animals and plants produced from all culture practices. The data were formerly published yearly in the FAO Fishery Circular No 815 and following revisions up to No 11. The statistics in quantity and value are presented by country or territory, species, culture environment and year and for various aggregations. In order to provide complete coverage of aquaculture production statistics throughout the world where officially reported national statistics are

lacking or are considered unreliable FAO makes estimates based on the best information available FAO gratefully acknowledges cooperation received from national authorities and others providing statistics and information and welcomes comments suggestions and additional information from users of the statistics Book jacket

Educating Across Borders

María Teresa de la Piedra, Blanca Araujo, Alberto Esquinca, 2018-11-20 Educating Across Borders is an ethnography of the learning experiences of transfronterizxs border crossing students who live on the U S Mexico border their lives spanning two countries and two languages Authors María Teresa de la Piedra Blanca Araujo and Alberto Esquinca examine language practices and funds of knowledge these students use as learning resources to navigate through their binational dual language school experiences The authors who themselves live and work on the border question artificially created cultural and linguistic borders To explore this issue they employed participant observation focus groups and individual interviews with teachers administrators and staff members to construct rich understandings of the experiences of transfronterizx students These ethnographic accounts of their daily lives counter entrenched deficit perspectives about transnational learners Drawing on border theory immigration and border studies funds of knowledge and multimodal literacies Educating Across Borders is a critical contribution toward the formation of a theory of physical and metaphorical border crossings that ethnic minoritized students in U S schools must make as they traverse the educational system

Biocosmism

Jorge Quintana Navarrete, 2024-04-05 Honorable Mention Premio al Mejor Libro en Humanidades Latin American Studies Association Mexico Section 2025 Most scholars study postrevolutionary Mexico as a period in which cultural production significantly shaped national identity through murals novels essays and other artifacts that registered the changing political and social realities in the wake of the Revolution In Biocosmism Jorge Quintana Navarrete shifts the focus to examine how a group of scientists artists and philosophers conceived the manifold relations of the human species with cosmological forces and nonhuman entities animals plants inorganic matter and celestial bodies among others Drawing from recent theoretical trends in new materialisms biopolitics and posthumanism this book traces for the first time the intellectual constellation of biocosmism or biocosmic thought the study of universal life understood as the vital vibrancy that animates everything in the cosmos from inorganic matter to living organisms to outer space It combines both analysis of unexplored areas such as Alfonso L Herrera s plasmogeny and innovative readings of canonical texts like Vasconcelos s *La raza cósmica* to examine how biocosmism produced a wide array of utopian projects and theorizations that continue to challenge anthropocentric biopolitical frameworks
