Latin

American Science Fiction Writers Darrell B. Lockhart,2004-03-30 Many readers are unaware of the vast universe of Latin American science fiction which has its roots in the 18th century and has flourished to the present day Because science fiction is part of Latin American popular culture it reflects cultural and social concerns and comments on contemporary society While there is a growing body of criticism on Latin American science fiction most studies treat only a single author or work This reference offers a broad overview of Latin American science fiction Included are alphabetically arranged entries on 70 Latin American science fiction writers While some of these are canonical figures others have been largely neglected Since much of science fiction has been written by women many women writers are profiled Each entry is prepared by an expert contributor and includes a short biography a discussion of the writer s works and primary and secondary bibliographies The volume closes with a general bibliography of anthologies and criticism

Latin American and Iberian Perspectives on

Literature and Medicine Patricia Novillo-Corvalán,2015-06-05 This is the first study to examine the representation of illness disability and cultural pathologies in modern and contemporary Iberian and Latin American literature Innovative and interdisciplinary the collection situates medicine as an important and largely overlooked discourse in these literatures while also considering the social political religious symbolic and metaphysical dimensions underpinning illness Investigating how Hispanic and Lusophone writers have reflected on the personal and cultural effects of illness it raises central questions about how medical discourses cultural pathologies and the art of healing in general are represented Essays pay particular attention to the ways in which these interdisciplinary dialogues chart new directions in the study of Hispanic and Lusophone cultures and emerging disciplines such as the medical humanities Addressing a wide range of themes and subjects including bioethics neuroscience psychosurgery medical technologies Darwinian evolution indigenous herbal medicine the rising genre of the pathography and the illness as metaphor trope the collection engages with the discourses of cultural studies gender studies disability studies comparative literature and the medical humanities This book enriches and stimulates scholarship in these areas by showing how much we still have to gain from interdisciplinary studies working at the intersections between the humanities and the sciences
