Lost And Found Opposites:

Lost and Found in Mathematics. Dissident cosmologists's guide to the Universe Victor Christianto, Florentin Smarandache, 2022-09-01 This book is inspired by a German theoretical physicist Sabine Hossenfelder's publication *Lost in Mathematics*. Her book seems to question highly mathematical and a lot of abstraction in the development of physics and cosmology studies nowadays. There is clear tendency that in recent decades the physics science has been predominated by such an advanced mathematics which at times sounding more like acrobatics approach to a reality. Through books by senior mathematical physicists like Unzicker and Peter Woit we know that the answer of TOE is not in superstring theories or other variations of such 26 dimensional bosonic string theory of which none of those theories survived experimental test but perhaps in low dimensional physics. As Alexander Unzicker suggests perhaps it is more advisable to consider rotation in 3D space known as SO3 or a kind of superfluid vortices version of gravitation theory. We can also reconsider proposition by the late Prof F Winterberg formerly professor at Univ Nevada Reno that it is most likely that superfluid phonon roton theory in 3D can replace the entire superstring theories. While we don't explore yet implications of his model to particle physics we discuss here some published papers at several journals in the past few years.

Our Lady of the Lost and Found Diane Schoemperlen, 2002-07-30 One Monday morning in April a middle aged writer walks into her living room to water the plants and finds a woman standing beside her potted fig tree. Dressed in a navy blue trench coat and white Nikes the woman introduces herself as Mary Mother of God. You know Mary. Instead of a golden robe or a crown she arrives bearing a practical wheeled suitcase. Weary after two thousand years of adoration and petition Mary is looking for a little R R. She's asked in for lunch and decides to stay a week. As the story of their visit unfolds so does the story of Mary one of the most complex and powerful female figures of our time and her changing image in culture art history as well as the thousands of recorded sightings that have placed her everywhere from a privet hedge to the dented bumper of a Camaro. As this Everywoman and Mary become friends their conversations both profound and intimate touch upon Mary's significance and enduring relevance. Told with humor and grace *Our Lady of the Lost and Found* is an absorbing tour through Mary's history and a thoughtful meditation on spirituality our need for faith and our desire to believe in something larger than ourselves. **The**

Cutlip, 2020-11-06 Exercises in opposites reconciliation is a means of bringing to awareness the unity of the opposites of being revealing the third part the neutronic core of being which becomes a threefold reconciliation of one s threefold being within the Consciousness of God We are led to realize that the three parts of being are interchangeable parts of the same thing Inasmuch as it is not an easy thing to bring awareness the nature of one s being as it is created within the Consciousness of God there are lots of repetitions in the exercises within this book It is the Christ Self of one s being in God that reconciles the opposites of being within the Kingdom of god and delivers the Kingdom unto God that God may be realized to be the all in all within all Accordingly the reconciliation of all things unto God is the reconciliation of any and all seeming opposites that come to mind It is a matter of losing and finding every part of an opposites hidden within its

counterpart Thus life and death are one in the other and there revealed Life is revealed yet hidden in death and death is revealed yet hidden in life Life and death are inseparable parts of the same thing Such is why one must lose life in order to find it We come to realize that we must embrace both sides of an opposite not just one ore the other A life that denies its counterpart death is a life in part Hearing that denies its counterpart deafness is hearing in part Seeing that denies its counterpart blindness is seeing in part Such is what the scriptures both the Old and the New Testament are ever seeking to reveal The nature of the revelation of this insight is such that it may appear as a new revelation However when one becomes aware of this seemingly new revelation one come to realize that it is a part of an everlasting message that is without beginning or end What is new for the time is the doing away with the part reconciling it with the whole in order to see what is in transonic reality Accordingly one has been is now and forever will be confronted with this message for it is a part of the nature one s being as it is ever being created in the image of God the all in all of being

Shakespeare and Lost Plays David McInnis,2021-03-25 Shakespeare and Lost Plays returns Shakespeare s dramatic work to its most immediate and arguably pivotal context by situating it alongside the hundreds of plays known to Shakespeare s original audiences but lost to us David McInnis reassesses the value of lost plays in relation to both the companies that originally performed them and to contemporary scholars of early modern drama This innovative study revisits key moments in Shakespeare s career and the development of his company and by prioritising the immense volume of information we now possess about lost plays provides a richer more accurate picture of dramatic activity than has hitherto been possible By considering a variety of ways to grapple with the problem of lost imperceptible or ignored texts this volume presents a methodology for working with lacunae in archival evidence and the distorting effect of Shakespeare centric narratives thus reinterpreting our perception of the field of early modern drama

Lost Knowledge of the Imagination Gary Lachman,2017-10-19 The ability to imagine is at the heart of what makes us human Through our imagination we experience more fully the world both around us and within us Imagination plays a key role in creativity and innovation Until the seventeenth century the human imagination was celebrated Since then with the emergence of science as the dominant worldview imagination has been marginalised depicted as a way of escaping reality rather than knowing it more profoundly and its significance to our humanity has been downplayed Yet as we move further into the strange new dimensions of the twenty first century the need to regain this lost knowledge seems more necessary than ever before This insightful and inspiring book argues that for the sake of our future in the world we must reclaim the ability to imagine and redress the balance of influence between imagination and science Through the work of Owen Barfield Goethe Henry Corbin Kathleen Raine and others and ranging from the teachings of ancient mystics to the latest developments in neuroscience The Lost Knowledge of the Imagination draws us back to a philosophy and tradition that restores imagination to its rightful place essential to our knowing reality to the full and to our very humanity itself
