Lost Secrets of Flemish Painting Sir Théodore Turquet de Mayerne, Donald C. Fels, 2001 **Archival Afterlives**, 2018-07-10 Archival Afterlives explores the posthumous fortunes of scientific and medical archives in early modern Britain If early modern natural philosophers claimed all knowledge as their province theirs was a paper empire But how and why did naturalists engage with archives and in particular with the papers of their dead predecessors This volume makes a firm case for expanding what counts as scientific labour integrating scribes archivist library keepers editors and friends and family of deceased naturalists into the history of science It shows how early modern natural philosophers pursued new natural knowledge in dialogue with their recent material past Finally it demonstrates the sustaining importance of archival institutions in the growth and development of the New Sciences Contributors are Arnold Hunt Michael Hunter Vera Keller Carol Pal Anna Marie Roos Richard Serjeantson Victoria Sloyan Alison Walker and Elizabeth Yale **The Materials and Craft of Early Iconographers** Mihaela D. Leonida, 2014-03-25 This book describes in detail the materials and techniques used by medieval iconographers It offers information about the natural sources the raw materials the tools and the technologies involved in preparing them The book allows entry into the secretive world of very knowledgeable and skilled artisans about which very little is known Topics covered include raw materials pigments binders solvents adhesives inks and varnishes Special chapters will be dedicated to the fresco technique as practiced by the early iconographers grinding painting on glass and the training apprenticeship of these craftsmen **Theory of the Image** Thomas Nail, 2019 We live in an age of the mobile image The world today is absolutely saturated with images of all kinds circulating around the world at an incredible rate The movement of the image has never been more extraordinary than it is today This recent kinetic revolution of the image has enormous consequences not only for the way we think about contemporary art and aesthetics but also for art history as well Responding to this historical moment Theory of the Image offers a fresh new theory and history of art from the perspective of this epoch defining mobility The image has been understood in many ways but it is rarely understood to be fundamentally in motion The original and materialist approach is what defines Theory of the Image and what allows it to offer the first kinetic history of the Western art tradition In this book Thomas Nail further develops his larger philosophy of movement into a comprehensive kinesthetic of the moving image from prehistory to the present The book concludes with a vivid analysis of the contemporary digital image and its hybridity ultimately outlining new territory for research and exploration across aesthetics art history cultural theory and media studies **Routledge Handbook of International Law and the Humanities** Shane Chalmers, Sundhya Pahuja, 2021-05-19 This Handbook brings together 40 of the world's leading scholars and rising stars who study international law from disciplines in the humanities from history to literature philosophy to the visual arts to showcase the distinctive contributions that this field has made to the study of international law over the past two decades Including authors from Australia Canada Europe India South Africa the UK and the USA all the contributors

engage the question of what is distinctive and critical about the work that has been done and that continues to be done in the field of international law and the humanities For many of these authors answering this question involves reflecting on the work they themselves have been contributing to this path breaking field since its inception at the end of the twentieth century For others it involves offering models of the new work they are carrying out or else reflecting on the future directions of a field that has now taken its place as one of the most important sites for the study of international legal practice and theory Each of the book's six parts foregrounds a different element or cluster of elements of international law and the humanities from an attention to the office conduct and training of the jurist and jurisprudent Part 1 to scholarly craft and technique Part 2 to questions of authority and responsibility Part 3 history and historiography Part 4 plurality and community Part 5 as well as the challenge of thinking and rethinking international legal concepts for our times Part 6 Outlining new ways of imagining and doing international law at a moment in time when original critical thought and practice is more necessary than ever this Handbook will be essential for scholars students and practitioners in international law international relations as well as in law and the humanities more generally

Everlasting Flowers between the Pages Jessie Wei-Hsuan Chen, 2025-09-25 In seventeenth century Europe florilegia were lavishly produced picture books that featured hand drawn or printed illustrations of a wide variety of flowers Many of the plants depicted in florilegia stemmed from the Americas and Asia and were much desired for cultivation and study in European gardens By approaching florilegia as material objects this colourfully illustrated volume offers new insights into how florilegia mirrored different forms of plant knowledge The volume reconstructs the expertise which gardeners compilers of florilegia and image makers must have possessed in order to cultivate the once living specimens and immortalise the flowers on paper and parchment

The Varnish and the Glaze Marjolijn Bol, 2023-04-21 A new history of the techniques materials and aesthetic ambitions that gave rise to the radiant verisimilitude of Jan van Eyck's oil paintings on panel Panel painters in both the middle ages and the fifteenth century created works that evoke the luster of precious stones the sheen of polished gold and silver and the colorful radiance of stained glass Yet their approaches to rendering these materials were markedly different Marjolijn Bol explores some of the reasons behind this radical transformation by telling the history of the two oil painting techniques used to depict everything that glistens and glows varnish and glaze For more than a century after his death the fifteenth century painter Jan van Eyck was widely credited with inventing varnish and oil paint on account of his unique visual realism Once this was revealed to be a myth the verisimilitude of his work was attributed instead to a new translucent painting technique the glaze Today most theories about how Van Eyck achieved this realism revolve around the idea that he was the first to discover or refine the glazing technique Bol however argues that rather than being a fifteenth century refinement varnishing and glazing began centuries before Drawing from an extensive body of recipes Bol pieces together how varnishes and glazes were first developed as part of the medieval art of material mimesis Artisans embellished metalwork and wood with varnishes and

glazes to imitate gold and gems infused rock crystal with oil resin and colorants to imitate more precious minerals and oiled parchment to transform it into the appearance of green glass Likewise medieval panel painters used varnishes and glazes to create the look of enamel silk and more The explorations of materials and their optical properties by these artists stimulated natural philosophers to come up with theories about transparent and translucent materials produced by the earth Natural historians influenced by medieval artists understanding of refraction and reflection developed theories about gems their creation and their optical qualities The Insect and the Image Janice Neri,2011 How the picturing of insects inspired new ideas about art science nature and commerce **Organic Mass Spectrometry in Art and Archaeology** Prof Maria Perla Colombini,Prof Francesca Modugno,2009-07-28 Offers an overview of the analysis of art and archaeological materials using techniques based on mass spectrometry Illustrates basic principles procedures and applications of mass spectrometric techniques Fills a gap in the field of application on destructive methods in the analysis of museum objects Edited by a world wide respected specialists with extensive experience of the GC MS analysis of art objects Such a handbook has been long awaited by scientists restorers and other experts in the analysis of art objects Traces of Vermeer Jane Jelley,2017-07-21 Johannes Vermeer s luminous paintings are loved and admired around the world yet we do not understand how they were made We see sunlit spaces the glimmer of satin silver and linen we see the softness of a hand on a lute string or letter We recognise the distilled impression of a moment of time and we feel it to be real We might hope for some answers from the experts but they are confounded too Even with the modern technology available they do not know why there is no evidence of any preliminary drawing why there are shifts in focus and why his pictures are unusually blurred Some wonder if he might possibly have used a camera obscura to capture what he saw before him The few traces Vermeer has left behind tell us little there are no letters or diaries and no reports of him at work Jane Jelley has taken a new path in this detective story A painter herself she has worked with the materials of his time the cochineal insect and lapis lazuli the sheep bones soot earth and rust She shows us how painters made their pictures layer by layer she investigates old secrets and hears travellers tales She explores how Vermeer could have used a lens in the creation of his masterpieces The clues were there all along After all this time now we can unlock the studio door and catch a glimpse of Vermeer inside painting light
