Introduction to Neurogenic Communication Disorders Hunter Manasco, 2017 **The SAGE Encyclopedia of Intellectual and Developmental Disorders** Ellen Braaten, 2018-01-29 This encyclopedia provides an inter disciplinary approach discussing the sociocultural viewpoints policy implications educational applications and ethical issues involved in a wide range of disorders and interventions Aphasiology Robert T. Wertz, Joseph R. Duffy, 2001-03-15 Frederic L Darley was the consummate clinical scientist One cannot peruse the literature on neurogenic communication disorders without constantly encountering his name his work his influence His work was monumental The contributors of the seven papers in this issue of Aphasiology have long and impressive track records as researchers and clinicians Their papers are important

because not only do they reflect how Darley's work has influenced diagnostic and patient management decisions but in some cases the contributors take issue with and/or expand on his work. This ability to question existing evidence was a trait that Fred Darley instilled in his students. Equally important is that each paper tells us something about him as a person as a mentor who shaped careers and about the love and respect his students and colleagues had for him. *The Handbook of Language and Speech Disorders* Jack S. Damico, Nicole Müller, Martin J. Ball, 2021-02-26 An authoritative overview of language and speech disorders featuring new and updated chapters written by leading specialists from across the field. The Handbook of Speech and Language Disorders Second Edition provides timely and authoritative coverage of current issues, foundational principles, and new research directions within the study of communication disorders. Building upon the reputation of the landmark first edition, this volume offers an exceptionally broad and in-depth survey of the field, presenting original chapters by internationally recognized specialists that examine an array of language, speech, and cognitive disorders and discuss the most crucial aspects of this evolving discipline while providing practical information on analytical methods and assessment. Now in its second edition, the Handbook features extensively revised and refocused content throughout, reflecting the latest advances in the field. Original and updated chapters explore diverse topics including literacy and literacy impairments, patterns of normal and disordered language development, hearing impairment and cochlear implants, language acquisition and language delay, dementia, dysarthria, ADHD, autism spectrum disorder, and many others. This acclaimed single-volume reference resource provides 26 original chapters which describe the latest in new research and which indicate future research directions. Covers new developments in research since the original publication of the first edition. Features in-depth coverage of the major disorders of language and speech, including new insights on perception, hearing impairment, literacy, and genetic syndromes. Includes a series of foundational chapters covering a variety of important general principles, including labelling, diversity, intelligibility, assessment, and intervention. The Handbook of Speech and Language Disorders Second Edition is essential reading for researchers, scholars, and students in speech and language pathology, speech, language, and hearing sciences, and clinical linguistics, as well as active practitioners and clinicians. *Neural Control of Speech* Frank H. Guenther, 2016-07-15 A comprehensive and unified account of the neural computations underlying speech production, offering a theoretical framework bridging the behavioral and the neurological literatures. In this book, Frank Guenther offers a comprehensive unified account of the neural computations underlying speech production, with an emphasis on speech motor control rather than linguistic content. Guenther focuses on the brain mechanisms responsible for commanding the musculature of the vocal tract to produce articulations that result in an acoustic signal conveying a desired string of syllables. Guenther provides neuroanatomical and neurophysiological descriptions of the primary brain structures involved in speech production, looking particularly at the cerebral cortex and its interactions with the cerebellum and basal ganglia, using basic concepts of control theory accompanied by nontechnical explanations to explore the computations performed by these brain

regions Guenther offers a detailed theoretical framework to account for a broad range of both behavioral and neurological data on the production of speech He discusses such topics as the goals of the neural controller of speech neural mechanisms involved in producing both short and long utterances and disorders of the speech system including apraxia of speech and stuttering Offering a bridge between the neurological and behavioral literatures on speech production the book will be a valuable resource for researchers in both fields
