Nato Air Power In The 1980s:

British Air Power in the 1980s R. A. Mason, 1984 **The Paths Of Heaven: The Evolution Of Airpower Theory: The School Of Advanced Airpower Studies** Philip S. Meilinger, 2000 **American Military Aviation** Charles Joseph Gross, 2002 Discusses major developments in aircraft doctrine training and operations The author also provides discussions of airlife in flight refueling military budgets industry and inter service squabbling He deftly sketches the evolution of the air arms of each of the different services and provides clear analysis of military budgets *Strategic deterrence in the 1980's* Roger D. Speed, 1980 **Air Power in the Age of Total War** John Buckley, 2006-05-09 Warfare in the first half of the 20th century was fundamentally and irrevocably altered by the birth and subsequent development of air power This work assesses the role of air power in changing the face of battle on land and sea Utilizing late 1990s research the author demonstrates that the phenomenon of air power was both a cause and a crucial accelerating factor contributing to the theory and practice of total war For instance the expansion of warfare to the homefront was a direct result of bombing and indirectly due to the extent of national economic mobilization required to support first rate air power status In addition the move away from the principle of total war with the onset of the Cold War and the replacement of air power by ICBMs is thoroughly examined This work should provide students of international history war studies defence and strategic studies with an insight into 20th century warfare **Deterrence in the 1980s: The role of conventional air power** Anthony H. Cordesman, Donald J. Alberts, 1984 *The Two Germanies and Military Security in Europe* C. Bluth, 2002-10-31 This original study based on documents hitherto not discussed in literature of the Cold War adds a significant new perspective to an important episode in Cold War History The subject of this book is the policy of the two Germanies towards the talks on Mutual and Balanced Force Reductions MBFR in Europe during the 1970s Negotiations on MBFR continued for a long time without progress There has been much speculation about the motivations of the Eastern side This book makes use of newly declassified files and for the first time reveals the true purposes and intentions of the Warsaw Pact in those negotiations **Air Force Journal of Logistics** , 1980 **NATO's Gamble** Dag Henriksen, 2013-11-15 Selected for the 2008 Royal Air Force Reading List In this revealing work Dag Henriksen discloses the origins and content of NATO's strategic and conceptual thinking on how the use of force was to succeed politically in altering the behavior of the Federal Republic of Yugoslavia FRY The air campaign known as Operation Allied Force was the first war against any sovereign nation in the history of NATO and the first major combat operation conducted for humanitarian purposes against a state committing atrocities within its own borders This book examines the key political diplomatic and military processes that shaped NATO and U S management of the Kosovo crisis and shows how air power became the main instrument in their strategy to coerce the FRY to accede to NATO's demands The book further shows that the military leaders set to execute the campaign had no clear strategic guidance on what the operation was to achieve and that the level of uncertainty was so high that the officers selecting the bombing targets

watched NATO's military spokesman on CNN for guidance in choosing their targets. Henriksen argues that structures preceding the Kosovo crisis shaped the management to a much greater degree than events taking place in Kosovo and that the air power community's largely institutionalized focus on high intensity conflicts like the 1991 Gulf War hampered them from developing strategies to fit the political complexities of crises. Because fighting and wars in the lower end of the intensity spectrum are likely to surface again, study of the Kosovo crisis offers lessons for future international conflicts in which the combination of force and diplomacy will play a very significant role.

Library, 1978 *Overview of Fiscal Year 1980 Budget for Defense and International Affairs* United States. Congress. House. Committee on the Budget. Task Force on Defense and International Affairs, 1979 **Department of Defense appropriations for fiscal year 1980** United States. Congress. Senate. Committee on Appropriations. Subcommittee on Department of Defense, 1979 *Department of Defense Authorization for Appropriations for Fiscal Year 1980* United States. Congress. Senate. Committee on Armed Services, 1979 **Harrier II** Lon Nordeen, 2014-02-15

When the first Harrier strike fighter was introduced by the Royal Air Force in the late 1960s it was hailed as a technological breakthrough with its speed, vertical short takeoff and landing capability, V-STOL. Today the Harrier II is one of the top weapons of choice for ground troops in Iraq and Afghanistan who need effective air support. This book chronicles the incredible development of this tactical fixed wing aircraft, a journey that in the author's opinion was successful solely because of the unswerving commitment of the U.S. Marine Corps. In tracing the Harrier II's history, Lon Nordeen highlights the teamwork, creativity and innovation that went into the design, development, fielding and operation of this unique aircraft. The story begins with the development of the U.S. Marine Corps air ground team, close air support concepts in the 1920s on the battlefields of the Pacific in the Second World War and the Korean conflict. Later in Vietnam, efforts were directed at improving the aviators' response time to calls for air support. Seeing V-STOL tactical airplanes as the only practical solution to this problem, the Marine Corps received their first AV-8As in 1971 and then set out to improve the Harrier's capability. This is the Harrier II's story, including its near cancellation in the late 1970s during the Carter Administration, developmental challenges in the early 1980s, international growth path with the addition of night attack capability and radar to its success in the Gulf War, Afghanistan and Operation Iraqi Freedom. This book includes interviews and insights from those involved, from pilots and military commanders to engineers and production personnel and even to those who opposed the program. It is the first book to be written about the Harrier II from the U.S. Marine Corps perspective that also discusses the selection and operational use of the aircraft by the United Kingdom, Spain and Italy.
