This is a book about a code and about coding. The code is a case study which has been used to teach courses in e-Science at the Australian National University since 2001. Students learn advanced programming skills and techniques in the Java language. Above all, they learn to apply useful object-oriented design patterns as they progressively refactor and enhance the software. We think

our case study EScope is as close to real life as you can get It is a smaller version of a networked graphical waveform browser which is used in the control rooms of fusion energy experiments around the world It is quintessential e Science in the sense of e Science being computer science and information technology in the service of science It is not speci cally Grid enabled but we develop it in a way that will facilitate its deployment onto the Grid The standard version ofEScope interfaces with a specialised database for waveforms and related data known asMDSplus On the acc panying CD we have provided you with software which will enable you to installMDSplus EScope and sample data les onto Windows or Linux c puters There is much additional software including many versions of the case study as it gets built up and progressively refactored using design patterns There will be a home web site for this book which will contain up to date information about the software and other aspects of the case study
