Politics Of Hunger The Allied Blockade Of Germany 1915 1919:

The Politics of Hunger Charles Paul Vincent, 1985 In his study of the Allied blockade of 1915-1919 Vincent examines the rationale and impact of this first large scale use of food as a weapon in the twentieth century Vincent demonstrates that the collapse of the German war effort was induced as much by prolonged hunger as by military reversal Under blockade since 1915 the starving Germans were by 1918 in a state of growing anarchy Remarkably however the armistice ending hostilities specifically required the continuation of the blockade until such time as German signatures had been affixed to a peace treaty

A Nation of Provincials Celia Applegate, 1990-01-01 This elegant and original study adds greatly to our understanding of national and regional identities in modern German history and the ways that these were constructed It is imaginatively researched intelligently argued and written with panache *A Nation of Provincials* is a major historical work that has much to contribute to larger contemporary debates about a usable German past David Blackbourn University of London This impeccably and thoroughly researched study is an excellent example of historical scholarship Applegate has quite imaginatively used a wide variety of primary and secondary sources This is a pioneering work that will stand alone in its field for some time Gary D Stark University of Texas Arlington

[Germany's Defeat in the First World War](#) Mark D. Karau, 2015-05-12 A noted World War I scholar examines the critical decisions and events that led to Germany's defeat arguing that the German loss was caused by collapse at home as well as on the front Much has been written about the causes for the outbreak of World War I and the ways in which the war was fought but few historians have tackled the reasons why the Germans who appeared on the surface to be winning for most of the war ultimately lost This book in contrast presents an in depth examination of the complex interplay of factors social cultural military economic and diplomatic that led to Germany's defeat The highly readable work begins with an examination of the strengths and weaknesses of the two coalitions and points out how the balance of forces was clearly on the side of the Entente in a long and drawn out war The work then probes the German plan to win the war quickly and the resulting campaigns of August and September 1914 that culminated in the devastating defeat in the First Battle of the Marne

Subsequent chapters discuss the critical factors and decisions that led to Germany's loss including the British naval blockade the role of economic factors in maintaining a consensus for war and the social impact of material deprivation

The Politics of Provisions John Bohstedt, 2016-02-24 The elemental power of food politics has not been fully appraised Food marketing and consumption were matters of politics as much as economics as England became a market society In times of dearth concatenations of food riots repression and relief created a maturing politics of provisions Over three centuries some eight hundred riots crackled in waves across England Crowds seized wagons attacked mills and granaries and lowered prices in marketplaces or farmyards Sometimes rioters parleyed with magistrates More often both acted out a well rehearsed political minuet that evolved from Tudor risings and state policies down to a complex culmination during the Napoleonic Wars Provision politics thus comprised both customary negotiations over scarcity and hunger and negotiations of the social vessel through the turbulence of dearth Occasionally troops killed rioters or judges condemned them to the gallows but increasingly riots prompted wealthy citizens to procure relief supplies In short food riots worked in a sense they were a first draft of the welfare state This pioneering analysis connects a generation of social protest studies spawned by E P Thompson's essay on the moral economy with new work on economic history and state formation The dynamics of provision politics that emerged during England's social economic and political transformations should furnish fruitful models for analyses of total war and famine as well as broader transitions elsewhere in world history

Hunger in War and Peace Mary Elisabeth Cox, 2019-05-09 At the outbreak of the First World War Great Britain quickly took steps to initiate a naval blockade against Germany In addition to military goods and other contraband foodstuffs and fertilizer were also added to the list of forbidden exports to Germany As the grip of the Blockade strengthened Germans complained that civilians particularly women and children were going hungry because of it The impact of the blockade on non combatants was especially fraught during the eight month period of the Armistice when the blockade remained in force Even though fighting had stopped German civilians wondered how they would go through another winter of hunger The issue became internationalised as civic leaders across the country wrote books pamphlets and articles about their distress and begged for someone to step in and relieve German women and children with food aid Their pleas were answered with an outpouring of generosity from across the world Some have argued then and since that these outcries were based on gross exaggerations based more on political need rather than actual want This book examines what the actual nutritional statuses of women and children in Germany were during and following the War Mary Cox uses detailed height and weight data for over 600 000 German children to show the true measure of overall deprivation and to gauge infant recovery

The Politics of Famine in European History and Memory Ingrid de Zwart, Miguel Ángel del Arco Blanco, 2025-05-15 This is the first book to bring together groundbreaking scholarship focusing on the various ways in which famines result from political decision making and how the threat occurrence relief or memory of famine is instrumentalized as a political and military tool Contributions to this volume reveal

the complexities variations and motivations behind the instrumentalization of famine by political actors and regimes and how the politics of perpetrating hunger and the politics of relieving it have often been intertwined They also address how famine legacies have been subsequently politicized in public debates educational practices and popular media and how these socially and politically constructed memories and myths in turn have shaped broader narratives about hunger and humanitarianism both in history and today The Politics of Famine in European History and Memory provides a crucial resource for scholars and students from all disciplines interested in the study of famines as well as those interested in the history of war and troubled pasts more generally

The Costs of War John Denson, 2017-07-05 The greatest accomplishment of Western civilization is arguably the achievement of individual liberty through limits on the power of the state In the war torn twentieth century we rarely hear that one of the main costs of armed conflict is long term loss of liberty to winners and losers alike Beyond the obvious and direct costs of dead and wounded soldiers there is the lifetime struggle of veterans to live with their nightmares and their injuries the hidden economic costs of inflation debts and taxes and more generally the damages caused to our culture our morality and to civilization at large The new edition is now available in paperback with a number of new essays It represents a large scale collective effort to pierce the veils of myth and propaganda to reveal the true costs of war above all the cost to liberty Central to this volume are the views of Ludwig von Mises on war and foreign policy Mises argued that war along with colonialism and imperialism is the greatest enemy of freedom and prosperity and that peace throughout the world cannot be achieved until the central governments of the major nations become limited in scope and power In the spirit of these theorems by Mises the contributors to this volume consider the costs of war generally and assess specific corrosive effects of major American wars since the Revolution The first section includes chapters on the theoretical and institutional dimensions of the relationship between war and society including conscription infringements on freedom the military as an engine of social change war and literature and the right of citizens to bear arms The second group includes reconsiderations of Lincoln and Churchill an analysis of the anti interventionist idea in American politics a discussion of the meaning of the just war an assessment of how World War I changed the course of Western civilization and finally two eyewitness accounts of the true horrors of actual combat by
