Aldrete, 2004-12-30 Despite the fact that the majority of the inhabitants of the Roman Empire lived an agricultural existence and thus resided outside of urban centers there is no denying the fact that the core of Roman civilization its essential culture and politics was based in cities Even at the furthest boundaries of the Empire Roman cities shared a remarkable and consistent similarity in terms of architecture art infrastructure and organization which was modeled after the greatest city of all Rome itself In Gregory Aldrete's exhaustive account readers will have the opportunity to peer into the inner workings of daily life in ancient Rome to witness the full range of glory cruelty sophistication and deprivation that characterized Roman

Art, Science, and the Natural World in the Ancient Mediterranean, 300 BC to AD 100 Joshua J. Thomas, 2021-12-22 The Hellenistic Period witnessed striking new developments in art literature and science This volume addresses a particularly vibrant area of innovation the study of animals and the natural world While Aristotle and his followers had revolutionized fields such as zoology and botany during the fourth century BC these disciplines took on exciting new directions during Hellenistic times Kings imported exotic species into their royal capitals from faraway lands Travel writers described unusual creatures that they had never previously encountered And buyers from a range of social levels chose works of art featuring animals and plants to decorate their palaces houses and tombs While textual sources shed some light on these developments the central premise of *Art Science and the Natural World in the Ancient Mediterranean* is that our surviving artistic evidence permits a fuller understanding Accordingly the study brings together a rich body of visual material that invites new observations on how and why knowledge of the natural world became so important during this period It is suggested that this cultural phenomenon affected many different groups in society from kings in Alexandria and Pergamon to provincial aristocrats in the Levant and from the Julio Claudian imperial family to prosperous homeowners in Pompeii By analysing the works of art produced for these individuals a vivid picture emerges of this remarkable aspect of ancient culture

A Disabled Apostle Isaac T. Soon, 2025-05-19 Speculation around the health of Paul the Apostle has been present since soon after his death Recently scholars have understood Paul to be disabled but have been wary of isolating precisely what his disabilities may have been or whether they are important for understanding his writings This book is the first full length study of Paul the Apostle and disability Using insights from contemporary disability studies Isaac

Soon analyses features of Paul's body in his ancient Mediterranean context to understand the ways in which his body was disabled. Focusing on three such ancient disabilities: demonization, circumcision, and short stature, this book draws on a rich variety of ancient evidence from textual sources and epigraphy to ancient visual culture to analyze ancient bodily ideals and the negative cultural effects such deviant persons generated. The book also examines Paul's use of his own disabilities in his letters and shows how disability is not subsidiary to his thought but a central aspect of it. This book also provides scholars with a new method for uncovering previously unrecognized disabilities in the ancient world. Last of all, it critiques the latent ableism in much New Testament scholarship which assumes that the figures of the early Jesus movement were able-bodied.

Ancient Meteorology Liba Taub, 2004-02-24 The first book of its kind in English looks at a wide range and diversity of literature and studies Greek and Roman approaches to the broad discipline which in classical antiquity included weather, earthquakes, and comets amongst more.

Space, Movement, and Visibility in Pompeian Houses Michael Anderson, 2022-12-31 This volume examines the pivotal role of movement, visibility, and experience within Pompeian houses as a major factor determining house form, the use of space, and the manner, meaning, and modalities of domestic daily life through the application of GIS-based analysis. Through close consideration of ancient literature, detailed explanations of methodology, and exploration of results, Michael Anderson provides new perspectives on Pompeian domestic space, including room types and household activities that rarely feature in the discussion of ancient housing. Readers gain a better understanding of priorities in the design of Pompeian houses, the degree to which daily life was interrupted by earthquake damage in the site's final years, and evolving motivations behind wall painting decoration. The volume not only explores how Pompeian houses reflected the needs of everyday life as imagined by their architects but also how these spaces served to influence and control daily activities and ultimately how they were transformed by the spatial and visual requirements of domestic life. *Space, Movement, and Visibility in Pompeian Houses* is suitable for students and scholars of Pompeian houses and domestic life, Roman architecture and urbanism, and spatial analysis and space syntax.
