Realism And Racism Concepts Of Race In Sociological Research:

Realism and Racism Bob Carter, 2002-01-04 There are continuing difficulties within social science surrounding concepts of race This book suggests that these difficulties stem from the uncertain ontological and epistemological status of ideas about race itself a consequence of the recognition that concepts of race have all but lost their relevance as sociologically significant descriptions This book surveys ways in which social scientists have attempted to come to terms with this situation before developing an alternative approach based on recent work by realist authors This approach offers a radical revision of orthodox debates about race concepts about the possibility of a social science and about the nature of empirical research This illustrated through two policy examples an account of post war migration to the UK and debates about trans racial adoption in the UK and the USA Qualitative Methods in Migration Studies Dr Theodoros

Iosifides, 2013-01-28 Recent years have witnessed growing interest in a series of issues related to migration including identity formation and change the role of social capital and social networks ethnic discrimination racism and xenophobia socio political participation and mobilisation and the complex nature of the causal mechanisms linked to migration issues that are better highlighted and investigated using qualitative methods Moving away from the quantitative and empiricist positivist approaches that have often characterised migration research Qualitative Methods in Migration Studies explores in a concise but comprehensive way the key issues involved in researching migratory phenomena in a qualitative manner It addresses themes including the basic characteristics of contemporary migration qualitative research into social processes related to migration and the relationship between theory research design and practice Drawing upon empirical case studies and a series of real and hypothetical examples the book develops a critical realist alternative both to empiricism and interpretivist social constructionist and post structuralist relativism in qualitative migration research With special emphasis on the meta theoretical dimensions of qualitative research practice this volume connects qualitative findings to policy formation and politics making exploring the multiple dimensions involved in researching migratory phenomena such as ontology epistemology methodology ethics and research practice As such it will be of interest to students and researchers in migration across the social sciences

professionals particularly in health and social care who wish to undertake social research It bridges the divide between assumptions of traditional research on the one hand and the inaccessibility of complex philosophies of research on the other Social Theory and Applied Health Research provides an accessible assessment of dilemmas facing social researchers in trying to make sense of the world of health care It links theory and method by presenting an account of how reflection can help amend complement and strengthen a practical research strategy Using clear diagrams tables and examples of recent research the book illustrates principles from social theory from a range of applied research studies This is essential reading for sociologists and psychologists conducting applied research as well as the health and social welfare professions including nurses therapists doctors social workers youth and community workers and teachers *On Class, Race, and Educational Reform* Antonia Darder, Cleveland Hayes II, Howard Ryan, 2023-03-23 *On Class Race and Educational Reform* provokes new dialogue between Marxists critical race theory scholars and other race inspired educational theorists with the aim of countering racism and class inequalities The book opens with a lead chapter by Howard Ryan a doctoral student with a background in teaching and labor organizing that substantively engages questions of class race and educational reform In response to the opening chapter educational theorists from Germany South Africa the UK and the USA provide insightful and penetrating responses highlighting the differences and similarities in perspectives The responses show how educators can overcome theoretical differences to create international collaborations and educational campaigns of solidarity that counter the treacherous impact of racism and class inequalities in the classroom and beyond The book includes a Foreword by Stephen Brookfield University of St Thomas USA and an Afterword by Cheryl Matias University of Kentucky USA
