Henry, George Julnes, Melvin M. Mark, 1998-06-29 Why is another theory of evaluation needed The paradigm wars have left a void in their wake A new theory firmly grounded in a credible philosophy of science is needed to guide practice The aim of this volume is to provide a new theory that captures the sensemaking contributions from post positivism and the sensitivity to values from constructivist traditions The theory presented here is not a slap dash synthesis of the competing paradigms it is a new approach Some of the contributions of the realist theory of evaluation are 1 providing a basis for principled discovery as

we oscillate between explanations and data 2 using explanation as a means for extrapolating findings from one evaluation to other settings 3 viewing all methods both quantitative and qualitative as aids to sensemaking that have strengths and flaws 4 connecting evaluation practice with the ultimate goal of most program evaluation social betterment and 5 balancing the focus of the evaluation between sensemaking and value inquiry This is the 78th issue of the quarterly journal New Directions for Evaluation
