Realtime French Cd Rom:

Real Time Computing Alexander D. Stoyenko, 2013-12-14 NATO's Division of Scientific and Environmental Affairs sponsored this Advanced Study Institute because it was felt to be timely to cover this important and challenging subject for the first time in the framework of NATO's ASI programme. The significance of real time systems in everyone's life is rapidly growing. The vast spectrum of these systems can be characterised by just a few examples of increasing complexity: controllers in washing machines, air traffic control systems, control and safety systems of nuclear power plants and finally future military systems like the Strategic Defense Initiative (SDI). The importance of such systems for the well being of people requires considerable efforts in research and development of highly reliable real time systems. Furthermore, the competitiveness and prosperity of entire nations now depend on the early application and efficient utilisation of computer integrated manufacturing systems (CIM) of which real time systems are an essential and decisive part. Owing to its key significance in computerised defence systems, real time computing has also a special importance for the Alliance. The early research and development activities in this field in the 1960s and 1970s aimed towards improving the then unsatisfactory software situation. Thus, the first high level real time languages were defined and developed: RTL 2, Coral 66, Procol LTR and PEARL. In close connection with these language developments and with the utilisation of special purpose process control peripherals, the research on real time operating systems advanced considerably.

Proceedings Of The Singaporean-french Ipal Symposium 2009 - Sinfra'09 (Cd-rom) Wee Kheng Leow, Daniel Racocanu, Feng Ding, Hao Li, 2009-02-11. This Singaporean French Symposium aims to strengthen existing research collaboration between French and Singapore scientists and to explore and develop new collaborations in IPAL (Image Perception Access Language), the Singaporean French international research lab created between the French National Research Center (CNRS), the National University of Singapore (NUS), the Institute for Infocomm Research (I2 R), A*STAR and the Joseph Fourier University (UJF). SinFra 09 welcomes researchers and collaborators under IPAL organizations and those who wish to collaborate with IPAL. The symposium proposes Tutorials and Scientific Sessions in relevant Singaporean French common interest fields related to the present and possible future activities in IPAL. We seek submissions of high quality original work in the following areas: existing IPAL areas like Medical Image Analysis and Access, Mobile Information Access and also new areas of collaboration between French and Singaporean scientists such as interactive digital media, cognitive vision and audio video surveillance and security, real time embedded systems, media and sensors networks, programming languages, language based security and quantum informatics.
