

MORALS AND ETHICS

Morals and ethics encompass the principles and values that govern human behavior and decision-making, promoting virtuous conduct and human well-being..

OVERVIEW

Morals and ethics are intertwined concepts that deal with principles and guidelines for human behavior and decision-making. Morals are personal beliefs and values that help individuals distinguish between right and wrong, while ethics provide a broader framework that evaluates and guides conduct within a specific context, such as a profession or society.

EXAMPLES

- **Telling the Truth** – Lying to others is disrespectful of them. Even when telling the truth might hurt us, it's still important to be truthful to be true to our best selves.
- **Work Ethic** – It would be wrong to sit around and not do anything all day then take a paycheck for the day. It's our responsibility to put effort in and work hard.

Reason And Morality:

Reason and Morality Alan Gewirth, 1978 Most modern philosophers attempt to solve the problem of morality from within the epistemological assumptions that define the dominant cultural perspective of our age Alan Gewirth's *Reason and Morality* is a major work in this ongoing enterprise Gewirth develops with patience and skill what he calls a modified naturalism in which morality is derived by logic alone from the concept of action I think that the publication of *Reason and Morality* is a major event in the history of moral philosophy It develops with great power a new and exciting position in ethical naturalism No one regardless of philosophical stance can read this work without an enlargement of mind It illuminates morality and agency for all E M Adams *The Review of Metaphysics* This is a fascinating study of an apparently intractable problem Gewirth has provided plenty of material for further discussion and his theory deserves serious consideration He is always aware of possible rejoinders and argues in a rigorous manner showing a firm grasp of the current state of moral and political philosophy Mind

The Union and Harmony of Reason, Morality, and Revealed Religion Walter Harte, 1738

Moral Imagination Mark Johnson, 1993 The Enlightenment idea that reason creates fixed moral rules that specify the right thing to do is mistaken according to Johnson because it misses the ways in which human conceptual systems are grounded in bodily experience and it ignores the expansive and constructive nature of our best moral thinking Since new findings in cognitive science explain reasoning in terms of prototypes frame semantics metaphor and basic level experience Johnson contends that we must revise our views of ethics and adopt an alternative conception of moral reflection one that is thoroughly imaginative

Educating Oneself in Public Michael S. Moore, 2000 The eleven essays in *Educating Oneself in Public* Critical Essays in Jurisprudence constitute an education in the Anglo American jurisprudence of the second half of the

twentieth century The book examines both the thought of major figures such as H L A Hart Joseph Raz Ronald Dworkin Lon Fuller and Richard Rorty and the general themes of major movements such as legal realism post modernism and pragmatism Despite this focus on the thoughts of others the book is not a survey but is a critical probing of particular ideas often attributed to such figures Detailed depth of understanding is sought about Hart s conception of a general jurisprudence that describes law in general Dworkin s conception of an internal jurisprudence that interprets the concept of law of our legal culture Fuller s ideal of a functional jurisprudence that seeks the essence of law in the values it serves the place of rules in legal and moral reasoning Raz s idea that laws give exclusionary reasons to legal actors subject to such laws how judges should reason according to the legal realists whether there are right answers to all disputed law cases whether behind the obvious law of legal rules there can exist an unobvious law of legal principles Finnis s conception of the common good as the function law uniquely serves in what sense law practice and legal theory are interpretive activities whether all knowledge or some discrete realm of knowledge is peculiarly interpretive in character Michael Moore s views on each of these topics are detailed and original even if the springboards for each discussion are the writings of those who introduced such topics into modern discussions The introductory chapter includes responses by many of the figures examined in the other essays together with the author s rejoinders

The Moral Psychology of Compassion Justin Caouette, Carolyn Price, 2018-03-16

Compassion is widely regarded as an important moral emotion a fitting response to various cases of suffering and misfortune Yet contemporary theorists have rarely given it sustained attention This volume aims to fill this gap by offering answers to a number of questions surrounding this emotion These questions include What is the nature of compassion How does compassion differ from other emotions such as empathy pity or gratitude Is compassion a virtue Can we have too much compassion How does compassion influence other mental states desires motivations beliefs and intentions and behaviour How is compassion influenced by the environment Must compassion be deserved Can one be moral while lacking the capacity for compassion Compassion like other emotions has many facets biological social psychological and neural among others The contributors to this volume will draw on a variety of disciplines and methods in order to develop a more systematic and comprehensive understanding of this often neglected moral emotion

Moral Dilemmas and Ethical Reasoning Carol Harding, 2017-07-05 This book deals with moral dilemmas and the development of ethical reasoning in two senses First the editor focuses on dilemmas both real and hypothetical which require moral judgments The Heinz dilemma part of Kohlberg s scoring system for level of moral development is in some cases used as a point of departure for discussion Problems with this particular dilemma as a scoring item are examined in detail along with problems generated by similar dilemmas for moral reasoning in everyday life Those who study moral reasoning and its development are in somewhat of a dilemma as they attempt to integrate information from the domains of philosophy and psychology These essays investigate domain issues in varied cultural settings and across genders and age ranges for what have been proposed as universals in moral judgment as

well as formulate theories that reflect both empirical evidence and logical process The essays share a conception of human nature as inherently social as well as a healthy respect for the problems or dilemmas which human sociality carries in its wake Some of these problems are theoretical such as those having to do with the moral reasoning or the classic issues of values justification Other problems are practical such as those having to do with distributive justice or methods of moral education This volume will shed light on the process of resolving dilemmas both within philosophy and psychology
