

Short Philosophy of Education Examples

My teaching philosophy is centered around seeing the whole student and allowing the student to use their whole self to direct their own learning. As a secondary teacher, I also believe strongly in exposing all students to the same core content of my subject so that they have equal opportunities for careers and other experiences dependent upon that content in the future.

Reason And Values New Essays In Philosophy Of Education:

Reason and Values John Peter Portelli, Sharon Bailin, 1993-01-01 Reason and Education H. Siegel, 2012-12-06 Israel Scheffler is the pre eminent philosopher of education in the English speaking world today This volume collects seventeen original invited papers on Scheffler s philosophy of education by scholars from around the world The papers address the wide range of topics that Scheffler s work in philosophy of education has addressed including the aims of education cognition and emotion teaching the language of education science education moral education religious education and human potential Each paper is followed by a response from Scheffler himself The collection is essential reading for anyone concerned with contemporary scholarship in philosophy of education or with the place of this singularly important author in it **Inquiry: A New Paradigm for Critical Thinking** Mark Battersby, Sharon Bailin, 2018-12-05 This volume reflects the development and theoretical foundation of a new paradigm for critical thinking based on inquiry The field of critical thinking as manifested in the Informal Logic movement developed primarily as a response to the inadequacies of formalism to represent actual argumentative practice and to provide useful argumentative skills to students Because of this the primary focus of the field has been on informal arguments rather than formal reasoning Yet the formalist history of the field is still evident in its emphasis with respect to both theory and pedagogy on the structure and evaluation of individual de contextualized arguments It is our view that such a view of critical thinking is excessively narrow and limited failing to provide an understanding of argumentation as largely a matter of comparative evaluation of a variety of contending positions and arguments with the goal of reaching a reasoned judgment on an issue As a consequence traditional critical thinking instruction is problematic in failing to provide the reasoning skills that students need in order to accomplish this goal Instead the goal of critical thinking instruction has been seen largely as a defensive one of learning to not fall prey to invalid inadequate or fallacious arguments Philosophy of Education in the Era of Globalization Yvonne Raley, Gerhard Preyer, 2009-12-04 Rather than having formed a global community today s society is more fragmented than ever In light of this education faces some formidable new challenges The authors of this collection of essays explore these challenges and suggest some novel ways of dealing with them *Paideusis* ,1991 **Philosophy of Education** Philosophy of Education Society (U.S.),1997 *Encyclopedia of Social Problems* Vincent N. Parrillo, 2008-05-22 Social problems affect everyone Because so many actual and potential problems confront us it is often difficult to decide which ones affect us most severely Is it the threat of death or injury during a terrorist attack Is it the threat caused by industrial pollution that may poison us or destroy our physical environment Or does quiet but viciously damaging gender age class racial or ethnic discrimination have the most far reaching effect Do the problems of cities affect us if we live in the suburbs Do poorer nations problems with overpopulation affect our quality of life The Encyclopedia of Social Problems offers an interdisciplinary perspective into many social issues that are a continuing concern in our lives whether we confront them on a personal local regional national or

global level With more than 600 entries these two volumes cover all of the major theories approaches and contemporary issues in social problems and also provide insight into how social conditions get defined as social problems and the ways different people and organizations view and try to solve them Key Features Provides as comprehensive an approach as possible to this multifaceted field by using experts and scholars from 19 disciplines anthropology biology business chemistry communications criminal justice demography economics education environmental studies geography health history languages political science psychology social work sociology and women s studies Presents a truly international effort with contributors from 17 countries Argentina Australia Canada England France Germany Greece Hong Kong India Ireland Italy Kenya New Zealand Romania Scotland Turkey and the United States Addresses social problems that are fairly new such as computer crimes and identity theft and others that are centuries old such as poverty and prostitution Examines social problems differently from place to place and from one era to another Explains the perspectives and foundations of various social theories and offers different lenses to view the same reality Key Themes Aging and the Life Course Community Culture and Change Crime and Deviance Economics and Work Education Family Gender Inequality and Sexual Orientation Health Housing and Urbanization Politics Power and War Population and Environment Poverty and Social Class Race and Ethnic Relations Social Movements Social Theory Substance Abuse Readers investigating virtually any social problem will find a rich treasure of information and insights in this reference work making it a must have resource for any academic library
