Reasoning With Statistics Simplified Examples In Communications Research:

Reasoning with Statistics Frederick Williams, 1968 **Communication Research Statistics** John C.

Reinard, 2006-04-20 While most books on statistics seem to be written as though targeting other statistics professors John Reinard's *Communication Research Statistics* is especially impressive because it is clearly intended for the student reader filled with unusually clear explanations and with illustrations on the use of SPSS I enjoyed reading this lucid student friendly book and expect students will benefit enormously from its content and presentation Well done John C Pollock The College of New Jersey Written in an accessible style using straightforward and direct language *Communication Research Statistics* guides students through the statistics actually used in most empirical research undertaken in communication studies This introductory textbook is the only work in communication that includes details on statistical analysis of data with a full set of data analysis instructions based on SPSS 12 and Excel XP Key Features Emphasizes basic and introductory statistical thinking The basic needs of novice researchers and students are addressed while underscoring the foundational elements of statistical analyses in research Students learn how statistics are used to provide evidence for research arguments and how to evaluate such evidence for themselves Prepares students to use statistics Students are encouraged to use statistics as they encounter and evaluate quantitative research The book details how statistics can be understood by developing actual skills to carry out rudimentary work Examples are drawn from mass communication speech communication and communication disorders Incorporates SPSS 12 and Excel A distinguishing feature is the inclusion of coverage of data analysis by use of SPSS 12 and by Excel Information on the use of major computer software is designed to let students use such tools immediately Companion Web Site A dedicated Web site includes a glossary data sets chapter summaries additional readings links to other useful sites selected calculators for computation of related statistics additional macros for selected statistics using Excel and SPSS and extra chapters on multiple discriminant analysis and loglinear analysis Intended Audience Ideal for undergraduate and graduate courses in *Communication Research Statistics* or *Methods* also relevant for many *Research Methods* courses across the social sciences **Research Methodology** Khan, 2011 *Research Methods in Mass*

Communication Guido Hermann Stempel, Bruce H. Westley, 1989 *Categorical Statistics for Communication Research* Bryan E. Denham, 2016-10-17 *Categorical Statistics for Communication Research* presents scholars with a discipline specific guide to categorical data analysis The text blends necessary background information and formulas for statistical procedures with data analyses illustrating techniques such as log linear modeling and logistic regression analysis Provides techniques for analyzing categorical data from a communication studies perspective Provides an accessible presentation of techniques for analyzing categorical data for communication scholars and other social scientists working at the advanced undergraduate and graduate teaching levels Illustrated with examples from different types of communication research such as health political and sports communication and entertainment Includes exercises at the end of each chapter and a companion

website containing exercise answers and chapter by chapter PowerPoint slides The SAGE Encyclopedia of Communication Research Methods Mike Allen, 2017-04-11 Communication research is evolving and changing in a world of online journals open access and new ways of obtaining data and conducting experiments via the Internet Although there are generic encyclopedias describing basic social science research methodologies in general until now there has been no comprehensive A to Z reference work exploring methods specific to communication and media studies Our entries authored by key figures in the field focus on special considerations when applied specifically to communication research accompanied by engaging examples from the literature of communication journalism and media studies Entries cover every step of the research process from the creative development of research topics and questions to literature reviews selection of best methods whether quantitative qualitative or mixed for analyzing research results and publishing research findings whether in traditional media or via new media outlets In addition to expected entries covering the basics of theories and methods traditionally used in communication research other entries discuss important trends influencing the future of that research including contemporary practical issues students will face in communication professions the influences of globalization on research use of new recording technologies in fieldwork and the challenges and opportunities related to studying online multi media environments Email texting cellphone video and blogging are shown not only as topics of research but also as means of collecting and analyzing data Still other entries delve into considerations of accountability copyright confidentiality data ownership and security privacy and other aspects of conducting an ethical research program Features 652 signed entries are contained in an authoritative work spanning four volumes available in choice of electronic or print formats Although organized A to Z front matter includes a Reader's Guide grouping entries thematically to help students interested in a specific aspect of communication research to more easily locate directly related entries Back matter includes a Chronology of the development of the field of communication research a Resource Guide to classic books journals and associations a Glossary introducing the terminology of the field and a detailed Index Entries conclude with References Further Readings and Cross References to related entries to guide students further in their research journeys The Index Reader's Guide themes and Cross References combine to provide robust search and browse in the e version **Introduction to Mass Communications** Warren Kendall Agee, Phillip H. Ault, Edwin Emery, 1982 **Technology Research Explained** Ketil Stølen, 2023-02-23 This book aims to help research practitioners in technology science avoid some of the most common pitfalls or at least make them easier to overcome Many technology scientists put too little weight on how they conduct their work and should be able to become significantly better at what they do by being more aware of methodological issues The book differs from other related works in two main respects First by focusing on creating producing or inventing new artifacts in other words technology science Second by describing a general approach to technology science linking together specialized research methods The book consists of 14 chapters Following the first introductory chapter are two chapters

providing the foundation for the rest of the book These chapters clarify the meaning of key concepts and describe an overall process for technology science The subsequent chapters 4 11 are about this process Chapters 4 5 and 6 concern problem analysis research planning and hypothesis formulation The following five chapters then aim at evaluation Chapter 7 introduces the concept of prediction which plays a fundamental role in evaluating hypotheses Chapters 8 10 address the evaluation of universal existential and statistical hypotheses Chapter 11 concerns quality assurance and introduces the concepts of validity and reliability Next in chapters 12 and 13 we address publishing with an emphasis on the specifics of technology science Eventually the last chapter chapter 14 briefly introduces the philosophy of science The book systematically collects in the form of suggestions recommendations and guidelines the author s 35 year experience as a researcher author and reviewer in technology science It is written for anyone working in technology science from master s students to researchers and supervisors
