

Locke on Reasoning

- In demonstrative reasoning, each link in the inferential chain is “intuitively” certain.
 - “reasoning concerning relations of ideas” [Hume]
- In probable reasoning, some links in the inferential chain are merely probable.
 - “moral reasoning”, “reasoning concerning matter of fact” [Hume]: “factual inference” for short
- For Locke, both types of reasoning involve rational *perception* of the links (IV xvii 2).

Reasoning in Evaluation Deborah M. Fournier, 1995 Evaluators are in the business of reasoning their way toward legitimate conclusions that clients and other stakeholder groups can use In everyday practice evaluators collect and combine evidence to draw conclusions about something or someone Reasoning is the basis for what evaluators do and what they tell their clients to do But is the reasoning sound Evaluative conclusions are often sources of controversy and the inferences drawn from evidence always have potential loopholes for error In what ways can the conclusions resulting from evaluations be trusted How can evaluators reliably combine evidence from multiple sources into a final judgment about the merit or worth of something How and in what ways can evaluative conclusions be justified in an objective way similar to empirical conclusions Obtaining answers to these perennial questions facing evaluators in every evaluation is the field's greatest unmet challenge To stimulate debate and encourage more scholarship in this area the authors in this volume of *New Directions for Evaluation* grapple with some of the thorny problems of how to better understand the reasoning process that is used to establish evaluative conclusions The reader will leave this discussion thinking more clearly and critically about logical practice appreciating the central role of reasoning in the successful practice of evaluation and pondering the various avenues by which to contribute to future developments BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved
