Rebuilding Construction Economic Change The British Construction Industry:

Rebuilding Construction Michael Ball, 1988-01-01 **Rebuilding Construction (Routledge Revivals)** Michael Ball, 2014-03-18 First published in 1988 this book analyses the changes that took place in the economic organisation of the British construction industry throughout the 1970s and early 1980s in particular considering its social and economic structure and examining the causes of its poor industrial record Michael Ball describes how the major firms survived the economic slump between 1973 and 1982 when construction workloads collapsed by substantially restructuring their operations relationships with clients workforces and subcontractors Detailed attention is paid to construction firms the workers they employ the influence of trade unionism and the role of other agencies in the building process Reissued at a particularly challenging time for the British construction industry this relevant and practical title will be of value to students and academics of economics and social change as well as those on courses for construction professionals Memories of Cities Jonathan Charley, 2016-04-22 *Memories of Cities* is a collection of essays that explore different ways of writing about the political and economic history of the built environment Drawing upon fiction and non fiction and illustrated by original photographs the essays employ a variety of narrative forms including memoirs letters and diary entries They take the reader on a journey to cities such as Glasgow Paris Moscow St Petersburg and Marseille laying bare the contradictions of capitalist architectural and urban development whilst simultaneously revealing alternative visions of how buildings and cities might be produced and organised **Making Sense of Construction Improvement** Stuart Green, 2023-12-15 *Making Sense of Construction Improvement* provides a critical evaluation of the construction improvement debate from the end of the Second World War through to the modern era The book offers unique insights into the way the UK construction sector is continuously shaped and re shaped in accordance with changes in the prevailing political economy This second edition brings the book up to date by including coverage of key trends from 2010 2023 The book has been substantially revised and reworked to include new material relating to the age of austerity and the subsequent period of political uncertainty initiated by the Brexit referendum Changes in the political economy are positioned alongside the rise of the sustainability agenda and the advent of zero carbon Particular attention is paid to the ongoing skills crisis and the over hyped advocacy of modern methods of construction MMC as the latest supposed panacea of industry improvement Coverage includes the Farmer 2016 report *Modernise or Die* and the *Construction Playbook* HM Government 2020 However perhaps the most important addition is a focus on the Grenfell Disaster 2017 and the subsequent revelations from the public enquiry Further intermediate milestones include *Building a Safer Future* Hackitt 2018 and the *Construction Sector Deal* HM Government 2018 The emerging consensus points towards a systemic failure involving not only the construction sector but also the entire system of regulation and compliance Tracing the failings back over time and scrutinising the role played by previous generations of policymakers Stuart Green ultimately argues that Grenfell was a disaster entirely foretold The insightful and critical analysis

of the industry contained within these pages is essential and timely reading for anyone who wants to understand how the construction sector arrived at where it is today and with that knowledge give further thought to where it might go next

The British Building Industry since 1800 Christopher Powell,2013-12-16 This scholarly and well researched study of the building industry documents the interplay of new materials and technologies costs and the changing social and economic forces that affected the decision making about our built environment over the last two centuries The author provides a succinct and readable survey of the growth and development of British building which will be of interest to all building specialists and those training for a career in the construction industry

Construction Quality and the Economy Low Sui Pheng,Lau Shing Hou,2019-01-08 This book discusses the relationship between construction quality and the state of the Singapore national economy and describes how construction quality is affected as contracting firms strategically manage issues relating to profitability and survivability during economic boom and bust cycles Adopting a three pronged approach to explain the key issues the book first explains the effect of the state of the Singapore national economy boom or bust on the construction quality delivered by contracting firms Secondly it explains how contracting firms respond to the performance of the national economy through their dynamic bidding strategies leading to significant quality trade offs in some instances especially when there is imprecise market information Thirdly it recommends various strategic measures that key stakeholders and government policy makers can take to circumvent the quality trade off in the construction industry when faced with dynamic fluctuations in the performance of the national economy Although the book focuses on Singapore it appeals to a global audience since countries worldwide and their respective building related stakeholders face the same issues in terms of the time cost quality trade off decision making

process involving the entire supply chain **Strategic Management in Construction** David Langford, Steven Male, 2008-04-15 This book reviews the general theory of strategy relates it to the particular circumstances of the construction industry and shows how it can be applied in practice It brings together ideas from economics marketing management business and politics to develop strategic management for both contractors firms and the associated professions Substantial changes have occurred in the industry since the book was first published in 1991 This Second Edition reflects the major developments that have followed the Latham and Egan reports and includes new chapters on international strategy and marketing showing how they can contribute to the strategic planning of construction organizations The book will provide a valuable tool for the strategic development of construction firms Ten years separate the editions during which period a significant number of British and other construction firms which had survived generations of proprietors merged changed beyond recognition or ceased trading One can not but wonder if publication of a work on strategic planning some twenty year earlier might have saved some of them Construction Manager The book presents the essential elements for managing at this higher level and should be a must for any construction professional who aspires to an executive position in industry as well as any student for construction management project management and organizational management in construction It comes highly recommended Engineering Construction and Architectural Management **The British Building Industry Since 1800** Christopher G. Powell, 1996 Powell introduces and describes two centuries of building activity and the building industry addressing such questions as why and what was built who decided to build and how they did so **Managing Innovation in Construction** Martyn Jones, Mohammed Saad,
