Encyclopedia of General Topology K.P. Hart, Jun-iti Nagata, J.E. Vaughan, 2003-11-18 This book is designed for the reader who wants to get a general view of the terminology of General Topology with minimal time and effort The reader whom we assume to have only a rudimentary knowledge of set theory algebra and analysis will be able to find what they want if they will properly use the index However this book contains very few proofs and the reader who wants to study more systematically will find sufficiently many references in the book Key features More terms from General Topology than any other book ever published Short and informative articles Authors include the majority of top researchers in the field Extensive indexing of terms

Lecture Notes On General Topology Guoliang Wang, 2020-12-17 This book is intended as a one semester course in general topology a point set topology for undergraduate students as well as first year graduate students Such a course is considered a prerequisite for further studying analysis geometry manifolds and certainly for a career of mathematical research Researchers may find it helpful especially from the comprehensive indices General topology resembles a language in modern mathematics Because of this the book is with a concentration on basic concepts in general topology and the presentation is of a brief style both concise and precise Though it is hard to determine exactly which concepts therein are basic and which are not the author makes efforts in the selection according to personal experience on the occurrence frequency of notions in advanced mathematics and to related books that have received

admirable reviews This book also contains exercises for each chapter with selected solutions Interrelationships among concepts are taken into account frequently Twelve particular topological spaces are repeatedly exploited which serve as examples to learn new concepts based on old ones

Recent Developments in Fractal Geometry and Dynamical Systems Sangita Jha, Mrinal Kanti Roychowdhury, Saurabh Verma, 2024-04-18 This volume contains the proceedings of the virtual AMS Special Session on Fractal Geometry and Dynamical Systems held from May 14 15 2022 The content covers a wide range of topics It includes nonautonomous dynamics of complex polynomials theory and applications of polymorphisms topological and geometric problems related to dynamical systems and also covers fractal dimensions including the Hausdorff dimension of fractal interpolation functions Furthermore the book contains a discussion of self similar measures as well as the theory of IFS measures associated with Bratteli diagrams This book is suitable for graduate students interested in fractal theory researchers interested in fractal geometry and dynamical systems and anyone interested in the application of fractals in science and engineering This book also offers a valuable resource for researchers working on applications of fractals in different fields

Generalized Metric Spaces and Mappings Shou Lin, Ziqiu Yun, 2016-10-20 The idea of mutual classification of spaces and mappings is one of the main research directions of point set topology In a systematical way this book discusses the basic theory of generalized metric spaces by using the mapping method and summarizes the most important research achievements particularly those from Chinese scholars in the theory of spaces and mappings since the 1960s This book has three chapters two appendices and a list of more than 400 references The chapters are The origin of generalized metric spaces Mappings on metric spaces and Classes of generalized metric spaces Graduates or senior undergraduates in mathematics major can use this book as their text to study the theory of generalized metric spaces Researchers in this field can also use this book as a valuable reference

Advances in Ring Theory Sergio R. López-Permouth, Dinh Van Huynh, 2011-01-28 This volume consists of refereed research and expository articles by both plenary and other speakers at the International Conference on Algebra and Applications held at Ohio University in June 2008 to honor S K Jain on his 70th birthday The articles are on a wide variety of areas in classical ring theory and module theory such as rings satisfying polynomial identities rings of quotients group rings homological algebra injectivity and its generalizations etc Included are also applications of ring theory to problems in coding theory and in linear algebra
