River Carping:

Downstream Movement of Lampreys and Fishes in the Carp Lake River, Michigan Vernon Calvert Applegate, 1961
An inclined screen trap was installed on the Carp Lake River Emmett County Michigan in the spring of 1948 and has been in almost continuous operation since that time The major goal of this project a precise determination of the length of the larval life of the sea lamprey was not attained because of the contamination of the stream above the dam with spawning lampreys The lampreys and other fishes collected in the trap did however provide extensive and valuable biological information The present report documents much of the information largely in tabular form accumulated over the operating seasons 1948 49 through 1957 58 the amount of detail has been varied according to the importance of the topic under consideration or the amount required to bring out a particular point

Carp, River Carpsucker, Smallmouth Buffalo, and Bigmouth Buffalo in Lewis and Clark Lake, Missouri River Charles H. Walburg, William Roland Nelson, 1966 Studies of age composition growth length weight relation reproduction year class strength and food habits were conducted from 1962 to 1964 on carp river carpsucker smallmouth buffalo and bigmouth buffalo in Lewis and Clark Lake a main stem Missouri River reservoir impounded in July 1955 Slow growth of these fishes was attributed to low standing crops of plankton and bottom fauna which may have resulted in excessive turbidity and rapid water exchange in the reservoir All four species produced strong year classes in the 2 years following impoundment of Lewis and Clark Lake reproduction since that time has been poor These species did not produce year classes comparable in abundance to those which occurred following impoundment because of unfavorable environmental conditions The probable major limiting successful reproduction was lack of rise in water level during the spawning period

Up on the River is John Madson's loving and often hilarious tribute to the people animal life and places of the Upper Mississippi Madson's Upper Mississippi is the part between the saints from St Louis to St Paul where for thirty years he explored the bright waters of the upper reaches of the mighty river itself as well as the tangled multitude of sloughs cuts and side channels that wander through its wooded islands and floodplain forests Some of my best time on the River has been in

the company of game wardens biologists commercial fishermen clammers trappers hunters and a smelly mud smeared coterie of river rats in general and my views of the River are far more likely to reflect theirs than those of the transportation industry Madson writes of his thirty year acquaintance with the Mississippi Traveling mainly by canoe and johnboat he tells of encounters between archetypal commercial fishermen and archetypal game wardens over hot fish chowder fishing for crappies in the tops of submerged trees and for walleyes amid gale force winds nesting and migrating herons and ducks and eagles the histories of river logging and pearling and button making and towboats and barges and the lives of the ramstugenous people who move freight on the river Learning about the Upper Mississippi via the wry tutelage of John Madson who discovered that whenever I am out on a river some of its freeness rubs off on me readers of this classic book will also come under the spell of this freeness
