Nidaros Office Of Holy Blood:

The Nidaros Office of the Holy Blood Gisela Attinger, Andreas Haug, 2004 When looking at Nidaros or Trondheim as the city is now called from the perspective of music history it was a hub of activity on the edge of medieval Europe Being the seat of the Norwegian archbishop from the middle of the twelfth century until the Reformation in 1537 it played an important role as an administrative and cultural centre not just in Norway but throughout the extensive archbishopric As elsewhere the musical practice of the cathedral was determined by the reception of the Roman Chant and the transition from a passive to an active productive chant reception can be seen in the musical compilations that have likely been produced by this centre One of them is the music for a local cult of a relic of the Holy Blood seemingly the oldest one of which the music has been preserved is the object of the present study It includes a facsimile of the only known course of the Office an edition of the texts and melodies a translation of the Latin texts and commentaries and essays on the liturgical importance and the historical background of the Office as well as the liturgical importance and the historical background of the Office as well as the building history of the church in which it was sung during the Middle Ages **Der heilige Wikingerkönig Olav**

Haraldsson und sein hagiographisches Dossier (2 vols.) Lenka Jiroušková, 2014-10-30 The twelfth century vita of Saint Olav the Norwegian King Olav Haraldsson is an outstanding example of how the intersection of power and sanctity was politically functionalised in the Middle Ages Olav s hagiographic dossier is transmitted in several and in part newly discovered manuscripts Its contents depend on both the Latin and the vernacular tradition while the milieus in which it was used range from the clerics of the High Middle Ages to the Hanseatic merchants at the end of the epoch Fourteen studies on language and style on codicological as well as cultic and cultural context of individual copies of the Passio Olavi on the veneration of Olav in Scandinavia England Northern France and Northern Germany on the construction of sanctity strategies of propagating Olav s cult and their narrative realisation and finally on changes of the text its spread and usage are presented alongside the first critical edition of the complete dossier **Nordic Latin Manuscript Fragments** Åslaug

Ommundsen, Tuomas Heikkilä, 2017-07-14 Much of what is known about the past often rests upon the chance survival of objects and texts Nowhere is this better illustrated than in the fragments of medieval manuscripts re used as bookbindings in the sixteenth and seventeenth centuries Such fragments provide a tantalizing yet often problematic glimpse into the manuscript culture of the Middle Ages Exploring the opportunities and difficulties such documents provide this volume concentrates on the c 50 000 fragments of medieval Latin manuscripts stored in archives across the five Nordic countries of Denmark Finland Iceland Norway and Sweden This large collection of fragments mostly from liturgical works provides rich evidence about European Latin book culture both in general and in specific relation to the far north of Europe one of the last areas of Europe to be converted to Christianity As the essays in this volume reveal individual and groups of fragments can play a key role in increasing and advancing knowledge about the acquisition and production of medieval books and in helping

to distinguish locally made books from imported ones Taking an imaginative approach to the source material the volume goes beyond a strictly medieval context to integrate early modern perspectives that help illuminate the pattern of survival and loss of Latin manuscripts through post Reformation practices concerning reuse of parchment In so doing it demonstrates how the use of what might at first appear to be unpromising source material can offer unexpected and rewarding insights into diverse areas of European history and the history of the medieval book

Secret Spaces: Sacred Treasures in England

1066-1320 Lesley Milner, 2024-05-27 The medieval treasure house consisting of sacristy vestry and treasure rooms was the depository for the ecclesiastical treasure belonging to a church holy vessels vestments altar hangings candlesticks and priceless liturgical books and reliquaries It was carefully designed to convey the message of its status and function A book devoted to these medieval museums which housed such precious materials is long overdue Ironically the interest in the objects that they conserved has often resulted in ecclesiastical treasure being removed to new museums leaving their former places of protection in need of protection themselves

Saints and Their Lives on the Periphery Haki Antonsson, Ildar H. Garipzanov, 2010 This volume examines the cult of the saints and their associated literature in two peripheral regions of Christendom which were converted to Christianity around the turn of the first millennium namely Scandinavia and Eastern Europe The fifteen authors focus on how cultures of sanctity were transmitted across the two regions and on the role that neighbouring Christian countries like England Germany and Byzantium played in that process The authors also ask to what extent the division

between Latin Christianity and Eastern Orthodoxy affected the early development of the cult of saints on the two peripheries The first part of the book offers for the first time a comprehensive overview of the veneration of local and universal saints in Scandinavia and northern Rus from c 1000 to c 1200 with a particular emphasis on saints that were venerated in both regions The second part presents examples of how some early hagiographic works produced on the northern and eastern peripheries borrowed adapted and transformed i e contextualized literary traditions from the Latin West and Byzantium
