Sir John Carew Eccles

Sherrington His Life And Thought:

Sherrington J. C. Eccles, W. C. Gibson, 2012-12-06 So much has been written about the scientific contributions of Sherrington that the man himself and his thoughts have been overshadowed More and more students of history are calling for creative writing on the whole man particularly when he is a genius Those interested in the genesis of ideas want to know the settings for discoveries and the relevant circumstances which ushered in new truths and new insights The prepared mind which Pasteur saw as the only one to be favoured by fortune is of immense importance in science and our account of Sherrington we hope will fill a very real gap in this field During his life Sherrington actively discouraged any suggestions that a biography be written For that reason it was not until 1947 that there were any biographical notes by John Fulton Graham Brown and A D Ritchie in a number of the British Medical Journal commemorating his ninetieth birthday and in addition there was a leading article entitled The Influence of Sherrington on Clinical Neurology He left no autobiographical material except the few pages of reminiscences entitled Marginalia an essay written in honour of Charles Singer 1953

Sherrington, His Life and Thought Sir John Carew Eccles, 1978 , **The Later Works of John Dewey, Volume 15, 1925 - 1953** John Dewey, 2008 This volume republishes sixty two of Dewey's writings from the years 1942 to 1948 four other items are published here for the first time A focal point of this volume is Dewey's introduction to his collective volume Problems of Men Exchanges in the Journal of Philosophy with Donald C Mackay Philip Blair Rice and with Alexander Meiklejohn in Fortune appear here along with Dewey's letters to editors of various publications and his forewords to colleagues books Because 1942 was the centenary of the birth of William James four articles about James are also included in this volume **Theology at War and Peace** Mark D. Chapman, 2016-10-14 This book is the first detailed discussion of the impact of the First World War on English theology Assessing the close relationships between English and German theologians before the First World War Chapman then explores developments throughout the war A series of case studies make use of a large amount of unpublished material showing how some theologians sought to maintain relationships with their German colleagues while others especially from a more Anglo Catholic perspective used the war as an opportunity to distance themselves from the liberal theology which was beginning to dominate the universities before the war The increasing animosity between Britain and Germany meant that relations were never healed English theology became increasingly insular dividing between a more home grown variety of liberalism and an ascendant Anglo Catholicism Consequently this book offers useful insights into the development of theology in the twentieth century and will be of keen interest to scholars and students of the history of theology *Sherrington* John C. Eccles, William C. Gibson, 1979 *The Who's Who of Nobel Prize Winners, 1901-2000* Louise S. Sherby, 2001-12-30 The Who's Who of Nobel Prize Winners is a one stop source of detailed information on the men and women who earned the Nobel Prize during the 20th century Organized chronologically by prize each extensive article contains in depth information on the laureate's life and career as well as a

selected list of his or her publications and biographical resources on the individual A concise commentary explains why the laureate received the award and summarizes the individual's other important achievements This completely updated edition also contains a history of the prize Four indexes distinguish this title from similar biographical references and enable researchers to search by name education nationality or citizenship and religion *The Later Works, 1925-1953* John Dewey, 1981 John Dewey's *Experience and Nature* has been considered the fullest expression of his mature philosophy since its eagerly awaited publication in 1925 Irwin Edman wrote at that time that with monumental care detail and completeness Professor Dewey has in this volume revealed the metaphysical heart that beats its unvarying alert tempo through all his writings whatever their explicit themes In his introduction to this volume Sidney Hook points out that Dewey's *Experience and Nature* is both the most suggestive and most difficult of his writings The meticulously edited text published here as the first volume in the series *The Later Works of John Dewey 1925-1953* spans that entire period in Dewey's thought by including two important and previously unpublished documents from the book's history Dewey's unfinished new introduction written between 1947 and 1949 edited by the late Joseph Ratner and Dewey's unedited final draft of that introduction written the year before his death In the intervening years Dewey realized the impossibility of making his use of the word experience understood He wrote in his 1951 draft for a new introduction Were I to write or rewrite *Experience and Nature* today I would entitle the book *Culture and Nature* and the treatment of specific subject matters would be correspondingly modified I would abandon the term experience because of my growing realization that the historical obstacles which prevented understanding of my use of experience are for all practical purposes insurmountable I would substitute the term culture because with its meanings as now firmly established it can fully and freely carry my philosophy of experience **The Human Brain and Spinal Cord** Edwin Clarke, Charles Donald O'Malley, 1996 What is Closer-to-the-truth? Theo A. F. Kuipers, 1987
