increasingly fraught relationship with what's true in politics and culture. For most of our history, Americans have depended on motion pictures to bring the realities of the world into view. And yet the richly complex, ever-evolving relationship between nonfiction movies and American history is virtually unexplored. *Screening Reality* is a widescreen view of how American truth has been discovered, defined, projected, televised, and streamed during more than one hundred years of dramatic change through World Wars I and II, the dawn of mass media, the social and political turmoil of the sixties and seventies, and the communications revolution that led to a twenty-first century of empowered yet divided Americans. In the telling, professional filmmaker Jon Wilkman draws on his own experience as well as the stories of inventors, adventurers, journalists, entrepreneurs, artists, and activists who framed and filtered the world to inform, persuade, awe, and entertain. Interweaving American and motion picture history and an inquiry into the nature of truth on screen, *Screening Reality* is essential and fascinating reading for anyone looking to expand an understanding of the American experience and today's truth-challenged times. **Nick**
