Shifting Map:

Shifts in Mapping Christine Schranz, 2021-11-05 Depicting the world territory and geopolitical realities involves a high degree of interpretation and imagination It is never neutral Cartography originated in ancient times to represent the world and to enable circulation communication and economic exchange Today IT companies are a driving force in this field and change our view of the world how we communicate navigate and consume globally Questions of privacy authorship and economic interests are highly relevant to cartography's practices So how to deal with such powers and what is the critical role of cartography in it How might a bottom up perspective and actions in map making change the conception of a geopolitical space **Border Shifts** N. Ribas-Mateos, 2016-01-12 *Border Shifts* develops a more complex and multifaceted understanding of global borders analysing internal and external EU borders from the Mediterranean region to the US Mexico border and exploring a range of issues including securitization irregular migration race gender and human trafficking

Cortical Maps: Data and Models Nick Swindale, Geoffrey Goodhill, 2022-07-12 **Resolving Maps and the Dimension Group for Shifts of Finite Type** Mike Boyle, Brian Marcus, Paul Trow, 1987 We give several results on necessary and sufficient conditions for the existence of special classes of maps from one shift of finite type onto another of the same entropy The classes we study include eventual right closing maps common right closing extensions and stable right closing maps Some analogous results for sofic systems are also given The necessary and sufficient conditions are described algebraically in terms of the dimension group associated to a shift of finite type by W Krieger *The Map Reader* Martin Dodge, Rob Kitchin, Chris Perkins, 2011-05-09 WINNER OF THE CANTEMIR PRIZE 2012 awarded by the Berendel Foundation The Map Reader brings together for the first time classic and hard to find articles on mapping This book provides a wide ranging and coherent edited compendium of key scholarly writing about the changing nature of cartography over the last half century The editorial selection of fifty four theoretical and thought provoking texts demonstrates how cartography works as a powerful representational form and explores how different mapping practices have been conceptualised in particular scholarly contexts Themes covered include paradigms politics people aesthetics and technology Original interpretative essays set the literature into intellectual context within these themes Excerpts are drawn from leading scholars and researchers in a range of cognate fields including Cartography Geography Anthropology Architecture Engineering Computer Science and Graphic Design The Map Reader provides a new unique single source reference to the essential literature in the cartographic field more than fifty specially edited excerpts from key classic articles and monographs critical introductions by experienced experts in the field focused coverage of key mapping practices techniques and ideas a valuable resource suited to a broad spectrum of researchers and students working in cartography and GIScience geography the social sciences media studies and visual arts full page colour illustrations of significant maps as provocative visual think pieces fully indexed clearly structured and accessible ways into a fast changing field of cartographic research *Language Mapping* Jürgen Erich

Schmidt,2011-03-30 The Handbook of Language Mapping aims to explore the core methodological and theoretical approaches of linguistic cartography In both empirical and theoretical linguistics the spatial variation of language is of increasing interest and the visualization of language in space is therefore also of growing significance It is the precondition for correct data interpretation But how does it work What has to be considered when drawing a map And how has the problem been tackled so far This book provides answers to such questions by taking a closer look at the theoretical issues surrounding cartography and at the concrete practice of mapping The fundamental issues raised are addressed particularly well since linguistic geography is not only one of the domains with a lengthy tradition it is also one of the most progressive fields in linguistics At the same time because of their visual primacy linguistic maps directly confront the challenges of human perception and aesthetics In this context envisioning the fruits of language mapping is a fascinating and inspiring endeavor not just for experts With its accessible texts and wealth of full color images the handbook not only represents a comprehensive manual serving the interests of a variety of readers it also fills a gap in the ongoing linguistic discourse
