Shifting Borders:

Shifting Borders Kent A. Ono, John M. Sloop, 2002 Like articles representing the positions of proponents of the measure those representing opponents construct the nation as potentially in danger as a result of undocumented immigration How do we learn to recognize the damning effects of good rhetorical intentions And where will we find arguments which escape this trap that permeates the liberal social policy world *Shifting Borders* uses an evaluation of the debate over California Proposition 187 to demonstrate how this quandary is best understood by close interrogation of mainstream reports and debates and by bringing to the fore voices that are often left out of mediated discussions It is these voices outside the mainstream so called outlaw discourses that hold the best possibilities for real social change To illustrate their claim the authors present dominant and outlaw discourses around Proposition 187 from television reports internet chat sites and religious discourse to coverage of the Los Angeles Times Their critique ably demonstrates how difficult it is to maintain a position outside the mainstream but also how important it is for the press citizens and scholars to actively search out such voices The find

Shifting Borders Jean-François Bélisle, Reid Cooper, Luke Nicholson, 2021-02-19 *Shifting Borders* brings together new research on visual culture by scholars located across North America This compilation of essays explores the notion of borders in a range of domains including art history architecture art theory video games performance art artistic creation and photography The authors seek to address contemporary concerns affecting larger society through the lens of visual culture The world is becoming increasingly globalized as nations and multilateral organizations advocate freer international trade the sharing of technological and political ideas and multiculturalism Yet despite a rhetorical attachment to the message of lower national barriers there has been a concomitant rise in veiled borders These barriers promise to maintain cultural exclusion and economic hegemony The essays in this volume share a desire to re examine inherited knowledge systems to redefine the terms of debate and create spaces that more accurately reflect a just reality While this is not the unique purview of Postmodern ethics what is novel here is the willingness of the authors of these essays and the artists they investigate to identify with dwell in and expand upon the margins of their particular subject matter The essays presented in *Shifting Borders* have the force to open up new forms and understandings of cultural difference and initiate new perspectives in and beyond their respective domains

Shifting Borders Stefano Jacoviello, Tamaso Sbriccoli, 2012-12-19 In the last few decades creolisation has become a recurrent feature in the works of scholars from many disciplines serving as a useful metaphor for understanding contemporary societies in a world of globalisation More than a metaphor creolisation can be conceived as a powerful analytical and theoretical tool in order to grasp the current dynamics of intercultural encounter and conflict allowing a close look at the production of new subjectivities and identities In accordance with this viewpoint in this book creolisation processes have been investigated under the interdisciplinary gaze of a wide European research group which has tried to detect creole patterns in the fields of literature arts politics and the labour market as well

as in the daily practices of people who enact peculiar strategies in order to posit themselves in highly exclusive contexts By focusing on the multiplicity of shifting borders that today articulate the sense of daily life along multiple contiguous universes this collective work addresses problems of citizenship intercultural politics and difficult cohabitations starting from the analysis of their narratives and discursive representations This volume thus has much to say about moving and mixing in our times and shows in more ways how thinking about creolist and related notions can be very fruitful

The EU's Shifting Borders Klaus Bachmann, Elzbieta Stadtmuller, 2012-03-12 The EU's internal borders have become mostly invisible Today external borders are at the centre of controversy about an alleged fortress Europe Using different theoretical and methodological perspectives this book examines the challenges facing the EU's external borders including Neighborhood Policy migration issues and the diffusion of norms and values to other countries Divided into two parts the book first presents different theoretical approaches and empirical studies of the EU's external borders mobility and security issues It is an invaluable guide to border research within a framework of European Integration and Globalization Studies The second part of this volume focuses on the analyses of the EU's Neighbourhood Policy the approach to Eastern Europe and EU energy policy Expert contributors collaborate to explore debates about migration the EU as a normative civil power energy security and the securitization of borders Highly relevant and insightful the text provides a timely assessment of EU borders in an increasingly globalized and integrated European neighbourhood The EU's Shifting Borders will be of interest to students and scholars of European Union Politics and International Relations

EU Enlargement, Region Building and Shifting Borders of Inclusion and Exclusion James Wesley Scott, 2016-04-22 The 2004 entry of 10 Central and Eastern European countries along with Malta and Cyprus into the EU has caused a huge shift in the EU's external boundaries The socio-economic and political transformations that this shift has caused not only suggest new regional development opportunities but also many potential problems and tensions While the EU insists that enlargement will not signify new divisions processes of inclusion and exclusion and the imposition of visa restrictions on non EU citizens could pose obstacles to co-operation conjuring fears of an emerging fortress Europe that effectively divides the continent Illustrated with case studies from Central and Eastern European border areas this book examines capacities for region building across national borders in within the context of EU enlargement synthesizing the various insights provided by local information and suggesting ways forward for the future development of the EU's Wider Europe strategy

The shifting border: Legal cartographies of migration and mobility Ayelet Shachar, 2020-03-24 The border is one of the most urgent issues of our times We tend to think of a border as a static line but recent bordering techniques have broken away from the map as governments have developed legal tools to limit the rights of migrants before and after they enter a country's territory The consequent detachment of state power from any fixed geographical marker has created a new paradigm the shifting border an adjustable legal construct untethered in space This transformation upsets our assumptions about waning sovereignty while also revealing the limits of the populist push toward border fortification At the same time it presents a tremendous opportunity to rethink states responsibilities to migrants This book proposes a new functional approach to human mobility and access to membership in a world where borders like people have the capacity to move

Changing Borders in Europe Jacint Jordana, Michael Keating, Axel Marx, Jan Wouters, 2018-12-21 Changing Borders in Europe focuses on the territorial dimension of the European Union It examines the transformation of state sovereignty within the EU the emergence of varied self determination claims and the existence of a tailor made architecture of functional borders established by multiple agreements This book helps to understand how self determination pressures within the EU are creating growing concerns about member states identity redefining multi level government in the European space It addresses several questions regarding two transformative processes blurring of EU borders and state sovereignty shifts and their interrelations from different disciplinary perspectives such as political science law political economy and sociology In addition it explores how the variable geographies of European borders may affect the issue of national self determination in Europe opening spaces for potential accommodations that could be compatible with existing states and legal frameworks This book will be of key interest for scholars students and practitioners of EU politics public administration political theory federalism and more broadly of European studies international law ethnic studies political economy and the wider social sciences

Shifting Borders Emily Butterworth, Kathryn Robson, 2001 This volume containing selected papers from a conference held by the Department of French in the University of Cambridge in 1999 addresses the exciting and challenging figure of the shifting border in modern French literature and literary theory Using a variety of critical approaches the contributors map the fluctuating borders in specific literary texts and explore how these moving boundaries reflect on their practice of literary analysis Inspired by the ideas of European and American thinkers including Giorgio Agamben Jacques Derrida Julia Kristeva Jacques Lacan and Jean Fran ois Lyotard they consider three major areas of current concern the construction of identity the conceptualisation of literary genres and the demarcation of geographical and cultural domains

Applying their insights to a wide ranging corpus of francophone texts this volume analyses the work both of canonical figures such as Mallarmé Proust and Zola and of lesser known writers such as Aimé Césaire Assia Djebar and St John Perse

Migrating borders and moving times Hastings Donnan, Madeleine Hurd, Carolin Leutloff-Grandits, 2017-04-21

Migrating borders and moving times analyses migrant border crossings in relation to their everyday experiences of time and connects these to wider social and political structures Sometimes border crossing takes no more than a moment sometimes hours some crossers find themselves in the limbo of detention for others the crossing lasts a lifetime to be interrupted only by death Borders not only define separate spaces but different temporalities This book provides both a single interpretative frame and a novel approach to border crossing an analysis of the reconfiguration of memory personal and group time that follows the migrants renegotiation of cross border space and recalibrations of temporality An electronic edition of this book is freely available under a Creative Commons CC BY NC ND licence
