Shiphandling with Tugs George H. Reid, 1986 In considerable detail Captain Reid discusses the various kinds of modern tugs their propulsion and steering systems and their handling characteristics Both the dynamics and the operations of handling tugs are explained and amply illustrated He shows how tugs are used as an auxiliary to shiphandling as a prime mover for dead ships drill rigs and construction barges and in special maneuvers with VLCCs and ULCCs

Marine Simulation and Ship Manoeuvrability M.S. Chislett, 2021-10-01 Real time interactive ship simulators limped onto the scene in the wake of flight simulators some years ago The maritime industries have a long history of conservatism but this is now changing rapidly The information age has also swept over ships and shipping and has been taken to heart to such an extent that for example flight simulators now cooperate with ship simulators and import useful new concepts and methodologies The more than 50 papers contained in this book show what and why Although traditionally conservative the marine world is also traditionally international and this has not changed The papers in the book are by leading authors from all over the world and provide a detailed snap shot of the rapidly advancing state of the art together with pointers to the future The overall theme of MARSIM 96 and therefore also of this book is Vessel manoeuvrability and marine simulation research training and assessment and includes original papers on topics such as bridge resource management distant learning and simulators coupled via The Internet virtual reality neural networks rudder propeller hydrodynamics prime mover models squat in shallow water and many more

Shiphandling Nick Nash, 2018 A Study of the Utilization of Tractor Tugs to Aid Shiphandling in Charleston Harbor Stephen Russell Smith, 1997 The use of tractor tugs throughout the United States for shiphandling and escort work has been a growing factor over the past several

years The West Coast has been on the leading edge in the use of these boats for tanker escort and ship assist work since the early 1980s Across the country the construction rate is now approaching ten new buildings a year and there are few signs of slowing On the East Coast however tug companies have generally failed to follow in the same direction as Pacific Coast tug owners such as Foss Maritime Crowley Marine and SeaSpan Many East Coast towing companies believe that the equipment currently in use is satisfactory for the work required It is also a general consensus that the cost of purchasing a new advanced tug is unwarranted by current demand The Port of Charleston South Carolina shares this same common problem with other East Coast ports such as Norfolk Savannah and New York The intent of this study is to determine a possible solution for the Port of Charleston of how best to handle ships of increasing size safely in a manner which is least expensive for the operation of the port as a whole Currently larger container vessels calling on the port s North Charleston Terminal are restricted in their transit times to the periods of flood tide only Additionally an increased number of private terminals will be increasing overall vessel calls A suggestion will be made for the best action to take considering the proper application of tractor tugs and their specialized operating modes This suggestion will be based on increasing the safety and efficiency of vessel transits in Charleston Harbor
