Ships Of The Inland Sea:

Ships of the Inland Sea Gordon R. Newell, 1951 Sunken Ships, World War II Karl Erik Heden, 2006 *Sunken Ships of World War II* is truly one of the greatest compendiums of naval history that has ever been put together. Not only does it give an exhaustive chronology of events and actions of the United States Navy, it also contains listings of the Allies American and English and of the Axis Japanese German and Italian naval losses wherever they took place. Each of the pages of this book is packed with minute information on each sunken vessel. Entries also include the most available information on the commanders, crews, size, displacement and location in degrees of each vessel, the battles, the forces and just about any other particular information of interest on each vessel. By any measurement, *Sunken Ships of World War II* stands alone for its depth and breadth of the information revealed in its detailed pages.

SAGUS Vol 33 Graham M Thomas, 2015-03-03 This volume about Marugame is more an extended essay that takes snapshots of a city that is not well known even in Japan. It covers a period from when I made my first visit in 1998 to 2015, the early chapters adapted from those that appeared in the first book I wrote. The waters of the Inland Sea lap on its shoreline, the air is tinged with salt, yet behind Marugame lie densely vegetated mountains that rise up steeply from a plain to create a geological amphitheatre, an ever present backdrop and the backbone of Shikoku. Thus trapped by rock and sea, the people of Marugame define and live out their lives.

Seascapes Jerry H. Bentley, Renate Bridenthal, Kären Wigen, 2007-04-30 Historians have only recently begun to chart the experiences of maritime regions in rich detail and penetrate the historical processes at work there. *Seascapes* makes a major contribution to these efforts by bringing together original scholarship on historical issues arising from maritime regions around the world. The essays presented here take a variety of approaches. One group examines the material, cultural and intellectual constructs that inform and explain historical

experiences of maritime regions Another set discusses efforts some more successful than others to impose political and military control over maritime regions A third group focuses on issues of social history such as labor organization information flows and the development of political consciousness among subaltern populations The final essays deal with pirates and efforts to control them in Mediterranean Japanese and Atlantic waters
